

science made accessible

The technology of creating or manipulating molecules or atoms to create microscopic structures, a process that has the potential to enhance desktop manufacturing, cellular repair, artificial intelligence, inexpensive space travel, clean and abundant energy, and environmental restoration. After biomedical research, defense-fighting cancer, and building missile shields nanotechnology has become one of the most highly energized disciplines in science and technology. The field is a vast grab bag of stuff that has to do with creating tiny things that sometimes just improve our lives. It borrows liberally from condensed-matter physics, engineering, molecular biology and large swaths of chemistry. Research
