command and a warfighting function ADRP 3-0 contains five chapters. Chapter 1 discusses military operations. It describes the variables that shape the nature of an operational environment and affect outcomes. The chapter then discusses unified action and joint operations as well as land operations. Finally, this chapter discusses the importance of training to gain skill in land warfare. Chapter 2 discusses the application of operational art. It discusses how commanders should consider defeat and stability mechanisms when developing an operational approach. It then discusses the elements of operational art and their meanings to Army forces. Chapter 3 discusses the Army's operational concept of unified land operations. It discusses how commanders apply landpower as part of unified action to defeat the enemy on land and establish conditions that achieve the joint force commander's end state. Chapter 4 discusses the principles of unified land operations and the tenets of unified land operations. Chapter 5 discusses the operations structure commanders use to array forces and conduct operations. It includes a discussion on the addition of a consolidation area to the operational framework. It concludes with a discussion on the operational framework used in the conduct of unified land operations. Chapter 6 discusses combat power. It opens with a discussion of the elements of combat power. It then discusses the six warfighting functions used to generate combat power and access joint and multinational capabilities. Lastly, it discusses how Army forces organize combat power through force tailoring, task organization, and mutual support.

Transportation Study Guide Stanley Berge, 1940 **Unified Land Operations** Department of the Army, 2011-10-10

When we published Change 1 to the 2008 edition of Field Manual FM 3-0, we captured the most critical lessons of almost ten years of sustained land combat. In this edition, we not only reflect on the past but also look to an uncertain future. Army Doctrine Publication ADP 3-0, Unified Land Operations, provides a common operational concept for a future in which Army forces must be prepared to operate across the range of military operations, integrating their actions with joint interagency and multinational partners as part of a larger effort. Unified Land Operations is a natural intellectual outgrowth of past capstone doctrine. AirLand Battle recognized the three-dimensional nature of modern warfare, while Full Spectrum Operations recognized the need to conduct a fluid mix of offensive, defensive, and stability operations simultaneously. This publication builds on both these ideas, adding that success requires fully integrating Army operations with the efforts of joint interagency and multinational partners. The central idea of Unified Land Operations is that Army units seize, retain, and exploit the initiative to gain and maintain a position of relative advantage in sustained land operations to create conditions for favorable conflict resolution. This central idea applies to all military operations: offensive, defensive, and stability, or defense support of civil authorities. This unifying principle connects the various tasks Army forces may perform. It adds the founding principles of flexibility, integration, lethality, adaptability, depth, and synchronization. It incorporates the principle that operational art is the connection between strategic objectives and tactical actions and provides a common construct for organizing military operations. The construct consists of the Army operations process, an operations framework for visualizing and describing operations, and the warfighting functions. ADP 3-0 serves as the common

operational concept for the Army The central idea adapted to the unique conditions of each conflict represents the Army s unique contribution to unified action It must permeate our doctrine our training and our leader professional development programs **Unified Land Operations** Department of the Army,2014-05-11 Chapter 1 shortens the discussion of the operational environment found on the now obsolete 2011 FM 3 0 Change 1 and emphasizes military operations This chapter provides a framework of variables of an operational environment that shape their nature and affect outcomes The chapter then discusses unified action and joint operations as well as land operations Finally this chapter discusses law of land warfare and combined arms Chapter 2 introduces the Army s new operational concept of unified land operations It discusses how commanders apply landpower as part of unified action to defeat the enemy on land and establish conditions that achieve the joint force commander s end state Chapter 2 discusses how commanders demonstrate the Army s new core competencies of combined arms maneuver and wide area security conducted through decisive action Chapter 3 discusses combat power and the warfighting functions used to generate combat power in support of unified land operations As in the now obsolete 2011 FM 3 0 Change 1 chapter 3 discusses the eight elements of combat power that include the six warfighting functions with leadership and information Lastly it discusses how Army forces achieve combined arms through force tailoring task organization and mutual support Chapter 4 discusses the elements of operational art and the meaning of operational art to Army forces It elaborates on commanders and staffs applying the elements of operational art to understand visualize and describe how to establish conditions to achieve a desired end state It discusses how operational art represents a creative approach to dealing with the direction of military forces and expresses an informed vision across the levels of war

doctrine publications ADP 3-0 presents overarching doctrinal guidance and direction for conducting operations. It constitutes the Army's view of how it conducts prompt and sustained operations on land and sets the foundation for developing the other principles, tactics, techniques, and procedures detailed in subordinate doctrine publications. An operation is a sequence of tactical actions with a common purpose or unifying theme. Army forces as part of the joint force contribute to the joint fight through the conduct of unified land operations. Unified land operations are simultaneous offensive, defensive, and stability or defense support of civil authorities tasks to seize, retain, and exploit the initiative to shape the operational environment, prevent conflict, consolidate gains, and win our Nation's wars as part of unified action. ADP 3-0 is the Army's basic warfighting doctrine and is the Army's contribution to unified action.
