 increasing number of people's lives and also a part of the usual presidential rhetoric Before the launch of YouTube in 2005

the enormous effects of this online phenomenon on all aspects of society could hardly be foreseen In 2011 however it is obvious that YouTube and other online media affect every day life including political decision making in many ways The 2004 US presidential election is often referred to as the first internet election as the candidates Howard Dean in particular started to use blogs and websites to raise money and convince voters online Zielmann R ttger 2009 77 By 2008 the internet had become even more diverse and complex and offered a lot of new online functions like social networking sites Facebook and video sharing sites YouTube These new opportunities were used by most of the candidates in the 2008 presidential election The later US President Barack Obama as well as his internal opponent Hillary Clinton made use of the internet to spread their political messages and address especially the younger voters A study that was conducted by the Pew Internet American Life Project during the 2008 election campaign proved that 40% of all adults accessed information about politics on the internet It also showed that viewers of politically relevant YouTube videos had become a key part of at least some campaign events Rainie Smith 2008 In 2008 the online world was not new to most people but it was used as a major propaganda tool by most politicians and their campaign teams for the first time In the Democratic primary elections several candidates did not announce their candidacy in the traditional press but online On July 23 2007 the first ever political debate took place on YouTube
