*Comprehensive Dissertation Index*, 1984      *Potestatemology* Edited by: Kisak, 2015-11-16 In social science and politics power is the ability to influence or control the behavior of people The term authority is often used for power perceived as legitimate by the social structure Power can be seen as evil or unjust but the exercise of power is accepted as endemic to humans as social beings In business power is often expressed as being upward or downward With downward power a company's superior influences subordinates When a company exerts upward power it is the subordinates who influence the decisions of their leader or leaders The use of power need not involve force or the threat of force coercion At one extreme it more closely resembles what English speaking people might term influence although some authors distinguish influence as a means by which power is used Much of the recent sociological debate about power revolves around the issue of its means to enable in other words power as a means to make social actions possible as much as it may constrain or prevent them The philosopher Michel Foucault saw power as a structural expression of a complex strategic situation in a given social setting that requires both constraint and enablement Potestatemology is the study of all the categories that influence power such as ideology politics and the psychology of power This book is about the study of power and is designed to be a general overview of the topic and provide you with the structured knowledge to familiarize yourself with the topic at the most affordable price possible The level of discussion is that of Wikipedia The accuracy and knowledge is of an international viewpoint as the edited articles represent the inputs of many knowledgeable individuals and some of the most currently available general knowledge on the topic based on the date of publication      The Study of Power Paul F. Kisak, 2015-12-04 In social science and politics power is the ability to influence or control the behavior of people The term authority is often used for power perceived as legitimate by the social structure Power can be seen as evil or unjust but the exercise of power is accepted as endemic to humans as social beings In business power is often expressed as being upward or downward With downward power a company's superior influences subordinates When a company exerts upward power it is the subordinates who influence the decisions of their leader or leaders The use of power need not involve force or the threat of force coercion At one extreme it more closely resembles what English speaking people might term influence although some authors distinguish influence as a means by which power is used Much of the recent sociological debate about power revolves around the issue of its means to enable in other words power as a means to make social actions possible as much as it may constrain or prevent them The philosopher Michel Foucault saw power as a structural expression of a complex strategic situation in a given social setting that requires both constraint and enablement Potestatemology is the study of all the categories that influence power such as ideology politics and the psychology of power This book is about the study of power      Certainty Paul F. Kisak, 2016-02-01 Certainty is perfect knowledge that has total security from error or the mental state of being without doubt Objectively defined certainty is total continuity and validity of all foundational inquiry to the highest degree of precision

Something is certain only if no skepticism can occur Philosophy at least historical Cartesian philosophy seeks this state It is widely held that certainty about the real world is a failed historical enterprise that is beyond deductive truths tautology etc This is in large part due to the power of David Hume s problem of induction Physicist Carlo Rovelli adds that certainty in real life is useless or often damaging the idea is that total security from error is impossible in practice and a complete lack of doubt is undesirable This book discusses the issues that surround claims of certainty and the illusion of absolute truth and perfection
