Automotive Engineering, 1995 *Practical Optical System Layout: And Use of Stock Lenses* Warren J. Smith, 1997
Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity or access to any online entitlements included with the product. A complete optical systems design course for general optical engineers. The first cut design of an optical system, anything from a telescope to a complicated VR helmet, is usually not done by a specialist but by a more general optical engineer. This book details the basic design principles and techniques for doing so in a clear, concise, low math way that such generalists will readily understand and appreciate. Practical step by step coverage includes succinct equations, simple diagrams and clear explanations. The chapter on selecting stock lens to test a concept or to prove out a possible finished device should be especially useful.
