## **Substation Commissioning Engineer Manual:**

*Electric Power Substations Engineering* John D. McDonald, 2017-12-19 The use of electric power substations in generation transmission and distribution remains one of the most challenging and exciting areas of electric power engineering. Recent technological developments have had a tremendous impact on all aspects of substation design and operation. With 80% of its chapters completely revised and two brand new chapters on energy storage and Smart Grids, *Electric Power Substations Engineering* Third Edition provides an extensive updated overview of substations serving as a reference and guide for both industry and academia. Contributors have written each chapter with detailed design information for electric power engineering professionals and other engineering professionals e.g. mechanical, civil who want an overview or specific information on this challenging and important area. This book emphasizes the practical application of the technology. It includes extensive use of graphics and photographs to visually convey the book's concepts. Provides applicable IEEE industry standards in each chapter. It is written by industry experts who have an average of 25 to 30 years of industry experience. Presents a new chapter addressing the key role of the substation in Smart Grids. Editor: John McDonald and this very impressive group of contributors cover all aspects of substations from the initial concept through design, automation and operation. The book's chapters, which delve into physical and cyber security, commissioning and energy storage, are written as tutorials and provide references for further reading and study. As with the other volumes in the *Electric Power Engineering Handbook* series, this book supplies a high level of detail and more importantly a tutorial style of writing and use of photographs and graphics to help the reader understand the material. Several chapter authors are members of the IEEE Power Energy Society PES Substations Committee and are the actual experts who are developing the standards that govern all aspects of substations. As a result, this book contains the most recent technological developments in industry practice and standards. Watch John D. McDonald talk about his book. *Advanced Hybrid Information Processing* Lin Yun, Jiang Han, Yu Han, 2024-03-23 This four volume set constitutes the post-conference proceedings of the 7th EAI International Conference on Advanced Hybrid Information Processing (ADHIP 2023) held in Harbin, China, during September 22-24, 2023. The 108 full papers presented were selected from 270 submissions and focus on the theory and application of hybrid information processing technology for smarter and more effective research and application. The theme of ADHIP 2022 was "Hybrid Information Processing in the Meta World". The papers are named in topical sections as follows: wireless communication for social information processing, artificial intelligence technology, mobile education, mobile monitoring, behavior understanding, and object tracking, wireless networks for social information processing.
