## **The Function Of Style:**

**The Function of Style** Farshid Moussavi, 2021-04-15 What is the function of style today If the 1970s were defined by Postmodernism and the 1980s by Deconstruction how do we characterize the architecture of the 1990s to the present Some built forms transmit affects of curvilinearity others of crystallinity some transmit multiplicity others unity some transmit cellularity others openness some transmit dematerialization others weight Does this immense diversity reflect a lack of common purpose In this book acclaimed architect and theorist Farshid Moussavi argues that this diversity should not be mistaken for an eclecticism that is driven by external forces The Function of Style presents the architectural landscape as an intricate web in which individual buildings are the product of ideas which have been appropriated from other buildings designed for the different activities of everyday life ideas which are varied to produce singular buildings that are related to one another but also different This network of connections is illustrated on the cover of this book and in more detail inside Moussavi argues that by embracing everyday life as a raw material architects can change the conventions of how buildings are assembled to ground style and the aesthetic experience of buildings in the micro politics of the everyday The third volume in Moussavi's Function series The Function of Style provides an updated approach to style which can be used as an invaluable and highly productive tool by architects today Assistant Editors Marco Ciancarella Jonathan A Scelsa Mary Crettier Kate Kilalea

**The Structure of Style** Shlomo Argamon, Kevin Burns, Shlomo Dubnov, 2010-09-13 Style is a fundamental and ubiquitous aspect of the human experience Everyone instantly and constantly assesses people and things according to their individual styles academics establish careers by researching musical artistic or architectural styles and entire industries maintain themselves by continuously creating and marketing new styles Yet what exactly style is and how it works are elusive We certainly know it when we see it but there is no shared and clear understanding of the diverse phenomena that we call style The Structure of Style explores this issue from a computational viewpoint in terms of how information is represented organized and transformed in the production and perception of different styles New computational techniques are now making it possible to model the role of style in the creation of and response to human artifacts and therefore to develop software systems that directly make use of style in useful ways Argamon Burns and Dubnov organize the research they have collected in this book according to the three roles that computation can play in stylistics The first section of the book Production provides conceptual foundations by describing computer systems that create artifacts musical pieces texts artworks in different styles The second section Perception explains methods for analyzing different styles and gleaning useful information viewing style as a form of communication The final section Interaction deals with reciprocal interaction between style producers and perceivers in areas such as interactive media improvised musical accompaniment and game playing The Structure of Style is written for researchers and practitioners in areas including information retrieval computer art and music digital humanities computational linguistics and artificial intelligence who can

all benefit from this comprehensive overview and in depth description of current research in this active interdisciplinary field
