The Generation Of Ideas:

The Generation of 1914 Robert WOHL, Robert Wohl, 2009-06-30 The generation of 1914 holds a special place in memory affection and myth In this irresistible and moving book Robert Wohl rescues it from the shadows of legend and brings it fully into the realm of understanding He tells the story of the young men the middle class elite of five European countries France Germany England Spain and Italy to recreate the generational consciousness that united them as well as the unique national experience that made them different These were men born at the end of the nineteenth century when the world of reason was disintegrating into a world of irrationality They were destined to rule but their lives were interrupted by the greatest of wars leaving them searching for identity and historical continuity Wohl recaptures this search through novels poems autobiographies memoirs sociological treatises philosophical essays university lectures political speeches conversations when recorded letters personal notebooks and newspaper articles His book is a brilliant study of European mentalities both collective and individual Probing behind ideas to find the experience that inspired them Wohl illuminates in unexpected ways the origins of World War I and its impact on its participants His exploration of the consciousness of generational unity and the power of the generational bond enables him to place in a novel context the spread of pessimism and despair the waning of liberal and humanitarian values the rise of Communist and Fascist movements and the sudden eruption of violence in Europe s progressive countries between the two world wars

The Myth of Generational Conflict Sara Arber, Claudine Attias-Donfut, 2002-01-04 The ageing of Western societies has provoked extensive sociological debate surrounding both the role of the state and whether it can afford the cost of an ageing population and the role of the family especially women in supporting older people In this important book the authors examine how changes such as cuts in welfare provision migration urbanization and individualisation influence intergenerational relations The collection addresses theoretical and policy issues connecting age and generation with the family and social policy and focuses both on cross cultural comparison within societies and analysis based on a range of societies This edited collection brings together a range of leading researchers and theorists from across Europe to advance a sociological understanding of generational relations in terms of the state and the family and how they are interlinked It will be of interest to academics and researchers in sociology social policy and ageing and to policy makers concerned with the implications of demographic and policy changes New Scientist ,1969 Design for a Composition Laura L.
