Google

1 Google is one of the most famous companies in the world. It started in 1998
2 when two students, Larry Page and Sergey Brin, created a search engine. A
3 search engine is a tool that helps people find information on the internet.
4 Google became popular because it was fast and gave helpful answers.
5 Today, millions of people use Google every day.
6 Google is not just a search engine. It also has many other services. For
7 example, Gmail is for sending emails, Google Maps helps people find places,
8 and Google Translate changes words from one language to another. There is
9 also YouTube, where people watch and share videos. Google even makes
10 phones and computers! Google is based in California, USA, in a place called
11 Silicon Valley. Its headquarters is known as the Googleplex, and it is famous
12 for being a fun place to work. Employees, called Googlers, can play games,
13 eat free food, and even take naps during the day. One reason Google is
14 successful is its technology. It uses something called algorithms, which are
15 like instructions for a computer. These algorithms make sure Google gives
16 the best answers to questions. Google also uses data to improve its services.
17 Data is information collected from people using Google. Google earns most
18 of its money from advertisements. When you search for something, you
19 might see ads on the top of the page. Companies pay Google to show these
20 ads because they know many people will see them. Google has changed how
21 people use the internet. It made finding information easy and helped
22 connect people all over the world. But, some people worry about Google
23 collecting too much information. This is why it is important to use the
24 internet safely.
