## **The Body In Three Dimensions:**

Three-dimensional Vortex-body Interaction in a Viscous Fluid Jeffrey S. Marshall, 1999 An experimental and computational study of the impact of a vortex with a body oriented normal to the vortex axis was performed Particular focus was placed on understanding characteristics of the secondary vorticity ejected from the body and the interaction of the secondary vorticity with the primary vortex Since both onset of boundary layer separation and the form of the secondary vorticity structures are sensitive to variation of the velocity normal to the body axis the effect of normal velocity on vortex body interaction was carefully examined The physical features of the flow evolution were categorized in terms of an impact parameter and a thickness parameter which respectively represent ratios of velocity and length scales associated with the vortex to those associated with the flow in the absence of the vortex Experiments were performed using a combination of laser induced fluorescence LIF flow visualization and particle image velocimetry PIV in a water tank to examine the form of the secondary vorticity structures with both high and low values of the impact parameter for normal vortex interaction with a circular cylinder and with a thin blade A new type of Lagrangian vorticity method based on a tetrahedral mesh was developed and applied to compute the secondary vorticity evolution during vortex cylinder interaction Computations were also performed for model problems to examine in detail wrapping of a vortex loop around a columnar vortex and impulsive cutting of a columnar vortex with finite axial flow

**A Program for Computing Steady Inviscid Three-dimensional Supersonic Flow on Reentry Vehicles** J. M. Solomon, M. Ciment, R. E. Ferguson, J. B. Bell, A. B Wardlaw (Jr), 1977 A comprehensive computational procedure is presented for predicting the supersonic region of the flow field on advanced reentry vehicle shapes in steady flight at pitch and yaw The procedure utilizes explicit second order accurate finite difference methods applied to the conservation law form of the steady inviscid flow equations Improved numerical methods are used at the body surface and the bow shock wave Provisions for treating body geometries with discontinuous slopes are also included Either perfect gas or real gas equilibrium thermodynamic properties can be used The computational procedure is implemented as a FORTRAN computer code which provides a practicable representation of the inviscid flow field and the resulting aerodynamic force and moment on the vehicle In this report Vol I the analytical and numerical development of the procedure is presented and the associated computer code is described A comparison report

*The Elements of Avicenna's Physics* Andreas Lammer,2018-02-05 This study is the first comprehensive analysis of the physical theory of the Islamic philosopher Avicenna d 1037 It seeks to understand his contribution against the developments within the preceding Greek and Arabic intellectual milieus and to appreciate his philosophy as such by emphasising his independence as a critical and systematic thinker Exploring Avicenna s method of teaching and learning it investigates the implications of his account of the natural body as a three dimensionally extended composite of matter and form and examines his views on nature as a principle of motion and his analysis of its relation to soul Moreover it demonstrates how Avicenna defends the Aristotelian conception of place against the strident criticism of his predecessors among other things by disproving the existence of void and space Finally it sheds new light on Avicenna s account of the essence and the existence of time For the first time taking into account the entire range of Avicenna s major writings this study fills a gap in our understanding both of the history of natural philosophy in general and of the philosophy of Avicenna in particular This monograph has been awarded the annual BRAIS De Gruyter Prize Kulturpreis Bayern in the Study of Islam and the Muslim World and the Iran World Award for Book of the Year 2020
