*Virtual Reality for Industrial Applications* Fan Dai, 2012-12-06 Just a few years ago virtual reality was regarded as more a  
toy than a tool Today however it is becoming the enabling technology for man machine communications The rapid  
development of graphics hardware and soft ware makes its application possible Besides building walkthroughs and landscape  
fly overs with very realistic visual effects we can recognize the trend toward industrial applications This is because of the  
emerging need for tools for rapid product development Especially in the aeronautical and automotive industries companies  
have begun to investigate and develop virtual reality tools for their own needs in co operation with research or ganizations In  
co operation with the Fraunhofer Institute for Computer Graphics IGD the Computer Graphics Center ZGDV in Darmstadt  
established the German working group on virtual reality in 1993 as a forum for infor mation exchange between industry and  
research German researchers system developers and industrial users have met several times in Darm stadt at the Computer  
Graphics Center In these meetings they discussed the essential issues inherent in applying virtual reality to industrial appli  
cations and exchanged their latest research results and experiences     **Transportation Research Thesaurus and User's**
