Paper Towel Colour Mixing

What you need:

- Water
- Food colouring
- White paper towels
- Small containers

What

1. Put red food colouring into one glass and blue food colouring into another glass. Add water to both glasses.

2. Using a 1:1 ratio of water and food colouring, mix a little.

3. Dip the tip of the paper towel into the colour water.

4. What can you see happening? What happens to the colour?

5. What colour can you see when the lines meet?

How

When you dip the paper towel into the water, it soaks up the water. The water travels up the paper towel and then moves outwards to meet other water molecules. When the water molecules meet, they are joined together, and this makes a pretty, new colour when you let them soak up the secondary colour.
