**Explainable AI and User Experience. Prototyping and Evaluating an UX-Optimized XAI Interface in Computer Vision** Georg Dedikov,2023-05-16 Master s Thesis from the year 2023 in the subject Computer Science SEO Search Engine Optimization grade 1 0 University of Regensburg Professur f r Wirtschaftsinformatik insb Internet Business Digitale Soziale Medien language English abstract This thesis presents a toolkit of 17 user experience UX principles which are categorized according to their relevance towards Explainable AI XAI The goal of Explainable AI has been widely associated in literature with dimensions of comprehensibility usefulness trust and acceptance Moreover authors in academia postulate that research should rather focus on the development of holistic explanation interfaces instead of single visual explanations Consequently the focus of XAI research should be more on potential users and their needs rather than purely technical aspects of XAI methods Considering these three impediments the author of this thesis derives the assumption to bring valuable insights from the research area of User Interface UI and User Experience design into XAI research Basically UX is concerned with the design and evaluation of pragmatic and hedonic aspects of a user s interaction with a system in some context These principles are taken into account in the subsequent prototyping of a custom XAI system called Brain Tumor Assistant BTA Here a pre trained EfficientNetB0 is used as a Convolutional Neural Network that can divide x ray images of a human brain into four classes with an overall accuracy of 98% To generate factual explanations Local Interpretable Model agnostic Explanations are subsequently applied as an XAI method The following evaluation of the BTA is based on the so called User Experience Questionnaire UEQ according to Laugwitz et al 2008 whereby single items of the questionnaire are adapted to the specific context of XAI Quantitative data from a study with 50 participants in each control and treatment group is used to present a standardized way of quantifying the dimensions of Usability and UX specifically for XAI systems Furthermore through an A B test evidence is presented that visual explanations have a significant 0 05 positive effect on the dimensions of attractiveness usefulness controllability and trustworthiness In summary this thesis proves that explanations in computer vision not only have a significantly positive effect on trustworthiness but also on other dimensions **Clark v. United Technologies Automotive, Inc., 459 MICH 681 (1999)** ,1999 108820 How does AI impact the organizational identity in client-focused investment advisory? Moritz Merklinger,2022-09-12 Seminar paper from the year 2021 in the subject Computer Sciences Artificial Intelligence grade 1 0 University of Passau language English abstract This paper answers the

question how AI does impact the organizational identity in client focused investment advisory It is evident that an employee s fundamental work may shift when working with a decision making self learning and intelligent AI It is also conceivable that the employee s own values or work identity may adjust to the AI in some way But what about when you do not just analyze the individual consultant If you look at the broader context and analyze the change in values and identity of the organization as a whole To understand how the values and identity of the individual but more importantly the identity of an organization are affected by the introduction of AI five asset managers from one of Germany s leading cooperative banks are interviewed coded and analyzed Based on research it is shown that while the introduction of AI has a major impact on the way advisors work it has little to almost no impact on the identity of the organization That this may have something to do with the scope of application of AI in the institution and the value stability of the bank will be discussed in more detail later in the paper The study joins the existing research on the topic of AI changing organizational identity     **AI ...** ,2001     **A Functional Description of the Edvac [an Automatically-sequence Serial Binary Electronic Digital Computer** Moore School of Electrical Engineering,1949
