**Utilizing Artificial Intelligence for Automated Greenhouse Gas Monitoring in Sustainable Agriculture** Ruth Nyads,2025-02-10 Scientific Study from the year 2024 in the subject Environmental Sciences Sustainability grade A language English abstract This research focused on the application of AI to support automatic tracking of GHG emissions in the agricultural sector one of the major contributors to emissions The proposed system for GHG tracking was designed with IoT sensors satellites and record keeping making it scalable and efficient compared to previous methods Some of the findings reveal that AI models are highly accurate in estimating emissions through models such as Gradient Boosting Machines hence cutting down the cost of manual exercise by an average of 29 7% Our analysis yields strong positive relationships between emissions and environmental conditions especially soil moisture content Nevertheless such issues as data protection and integration which are regarded as the major concerns in AI development this research proves that AI in sustainable agriculture can be effective and beneficial in combating climate change and meeting environmental requirements

□*AI-Proofing Job Interview Success* Etienne Noumen, This ebook outline a comprehensive strategy for job candidates to succeed in interview processes increasingly influenced by Artificial Intelligence AI It explain how AI is integrated into recruitment from Applicant Tracking Systems ATS screening resumes to AI powered video interviews and skills assessments The podcast emphasize the importance of

optimising application materials for AI using AI ethically for preparation and understanding AI's limitations and potential biases. Ultimately success requires a dual approach: mastering traditional interview skills while also navigating the technical and analytical aspects introduced by AI systems alongside highlighting distinctly human qualities that AI cannot easily evaluate.

**Human Factors in Design, Engineering, and Computing** Tareq Ahram, Waldemar Karwowski, Jay Kalra, 2025-11-20. Proceedings of the AHFE International Conference on Human Factors in Design Engineering and Computing AHFE 2025 Hawaii Edition Hawaii USA 8-10 December 2025.

Harnessing Artificial Intelligence for Climate Resilience in American Agriculture Ruth Nyads, 2025-02-10. Scientific Study from the year 2024 in the subject Environmental Sciences Sustainability grade A language English abstract. This study explores the integration of artificial intelligence (AI) in American agriculture to enhance climate resilience, focusing on three critical areas: Precision farming, crop yield prediction, resource optimization, and control of pests. The study adopts machine learning techniques, IoT real-time monitoring, and satellite data to compare the performance of AI interventions in addressing climate change risks. This paper establishes that AI leads to an increase in crop yields by 28.6%, a decrease in water use by 40%, and a decrease in pesticide use by 30%, proving the capacity of AI in productivity and sustainability. These findings are statistically significant as revealed by correlational coefficients showing the extent of associations between AI applications and agriculture. This study's contributions to knowledge and practice for policymakers, agribusinesses, and researchers are valuable despite the barriers, including high implementation costs and poor rural infrastructure. If these barriers are well addressed, then AI offers a perfect solution to developing a robust agriculture sector that can cope with climate volatility.

*Evaluating the Effects of Artificial Intelligence on Complexity in Marketing*, 2021-03-30. Bachelor Thesis from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1.9 Reutlingen University ESB Business School language English abstract. The research question explored in this paper is about a potential benefit of AI in marketing, which to this day is comparatively unexplored. Even though the concept of AI has been around since the 1950s and current research and development make significant progress in this area, scientific literature dealing with AI in marketing consists of less than 300 published articles. This paper distinguishes itself from related papers as it goes beyond investigating whether AI has an impact on business or not. The results of this thesis shall not only show the potential AI holds for marketing but also suggest constant theoretical exploration of untapped fields in marketing. The Internet of things (IoT) and big data changed customer behavior and how businesses work. This trend has led to a continued increase in complexity for marketing managers. In 2017, 8.4 billion devices were connected to the internet. This number is forecasted to increase to 20.4 billion by 2020. The immense amount of data generated, collected, and analyzed has propelled new markets such as big data and artificial intelligence. Marketing managers struggle to keep up with the sheer volume of data available and the surging complexity of marketing. Connecting dispersed data and finding patterns leads to helpful insights which are said to reduce complexity. Many

businesses lack a clear strategy to tap into the benefits of AI and gain a competitive advantage      **The 7th International Conference “Nanotechnology” (GTUnano)** Levan Chkhartishvili, Mikheil Chikhradze, Laszlo Kotai, 2025-12-03 Selected peer reviewed extended articles based on abstracts presented at the 7th International Conference Nanotechnology GTUnano2024 Aggregated Book      Human Systems Engineering and Design (IHSED 2025): Future Trends and Applications Tareq Ahram, Waldemar Karwowski, Darko Etinger, 2025-09-03 Proceedings of the 7th International Conference on Human Systems Engineering and Design Future Trends and Applications ISED 2025 September 22 24 2025 Juraj Dobrila University of Pula Croatia      Alloys Index ,1989      **Farm Journal** ,1981      Chilton's I & C S ,1986      **The Mining Journal, Railway and Commercial Gazette** ,1898      *The Saturday Evening Post* ,1916      *Electronic Products Magazine* ,1986
