The book covers various aspects of the management of keratoconus which is a leading cause of visual impairment in young adults. It focuses on the epidemiology and risk factors of keratoconus with a special focus on Southeast Asia. Keratoconus affects the quality of vision thereby affecting the quality of life. While most patients present with defective vision many are diagnosed accidentally during screening for refractive surgery. The book covers the varied epidemiology of keratoconus across different parts of the world. It discusses many systemic and ocular diseases associated with keratoconus. The book covers the newer diagnostic techniques and various treatment procedures for keratoconus helping in diagnosing keratoconus in the early stages and closely watching the progression. It discusses various contact lenses to improve vision quality. Widely used collagen crosslinking and its various modifications for halting the progression. It also explains the surgical approach for keratoconus such as penetrating keratoplasty, lamellar keratoplasty and other lens assisted procedures. Autism Steven Hyman, 2013-10-08 First published in 2001. This is Volume 2 in a series on the science of mental health and focuses on Autism. It begins with an overview presentation of a case and a recent consensus description of diagnostic instruments for autistic spectrum disorders. This is followed by recent epidemiologic data. Epidemiology has an enhanced prominence in studies of autism because there is an unresolved controversy about the incidence of new cases of autism. In some surveys the incidence of autism appears to be increasing and the controversy is over whether this is a true observation or whether greater diagnostic awareness is leading to the apparent increase. This volume attempts to resolve the conflicting data as if autism is indeed on the rise there must be a new significant environmental risk factor which has to be identified with a view to prevention
