neurology is one of the fastest growing subspecialties within neurology Running an efficient and effective neurohospitalist

internal medicine problems and often it is a general hospitalist without neurology training who treat these patients These

year of internal medicine training and require more guidance on medical problems Given these realities there is a need for a
resource on hospital neurology With The Hospital Neurology Book Drs Salardini and Biller have created a practical concise
and useful work that guides both neurologists and internists in the areas in which their training is currently not sufficient for
hospital practice The Hospital Neurology Book features a highly readable format providing information physicians can act
upon including recipes and protocols for patient care and question based chapter headings that lead physicians to the exact
