Who Can You Trust? Rachel Botsman, 2017-11-14 If you can't trust those in charge, who can you trust? From government to business banks to media, trust in institutions is at an all-time low. But this isn't the age of distrust; far from it. In this revolutionary book, world-renowned trust expert Rachel Botsman reveals that we are at the tipping point of one of the biggest social transformations in human history with fundamental consequences for everyone. A new world order is emerging; we might have lost faith in institutions and leaders, but millions of people rent their homes to total strangers, exchange digital currencies, or find themselves trusting a bot. This is the age of distributed trust, a paradigm shift driven by innovative technologies that are rewriting the rules of an all-too-human relationship. If we are to benefit from this radical shift, we must understand the mechanics of how trust is built, managed, lost, and repaired in the digital age. In the first book to explain this new world, Botsman provides a detailed map of this uncharted landscape and explores what's next for humanity. **Gaming**

Democracy Adrienne L. Massanari, 2024-10-29 How play and gaming culture have mainstreamed far-right ideology through social media platforms. From Gamergate to the ongoing Big Lie, the far right has gone mainstream. In *Gaming Democracy*, Adrienne Massanari tracks the flames of toxicity found in the far right and alt-right movements as they increasingly take up oxygen in American and global society. In this pathbreaking contribution to the fields of internet studies, game studies, and gender studies, Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide. These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms, algorithms, and attention economies. While populist movements are not new phenomena, such as QAnon, parental rights activism, and COVID denialism are uniquely of the internet, with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent. Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions. Using the lens of play and game studies, as well as the concept of metagaming, *Gaming Democracy* is a novel contribution to our understanding of online platforms and far-right political activism. **The New Peplum** Nicholas

Diak, 2018-01-12 *Peplum*, or sword and sandal films, an Italian genre of the late 1950s through the 1960s, featured ancient Greek, Roman, and Biblical stories with gladiators, mythological monsters, and legendary quests. The new wave of historic epics, known as neo-pepla, is distinctly different, embracing new technologies and storytelling techniques to create an immersive experience unattainable in the earlier films. This collection of new essays explores the neo-peplum phenomenon through a range of topics, including comic book adaptations like *Hercules*, the expansion of genre boundaries in *Jupiter Ascending*, and John Carter depictions of Romans and slaves in *Spartacus* and *The Eagle*, and Centurion as metaphors for America's involvement in the Iraq War. **Designing for Democracy** Jennifer Forestal, 2022 How should we fix digital technologies to

support democracy instead of undermining it In *Designing for Democracy* Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory *Designing for Democracy* provides blueprints for democracy in a digital age
