In *Obstetrics for Schools* A guide to eliminating failure and ensuring the safe delivery of all learners Rachel Macfarlane presents a powerful manifesto for school leaders and teachers on how they can bridge the advantage gap and deliver positive outcomes for all pupils In most parts of the world the death of a baby in childbirth is now a rare tragedy rather than a common occurrence and it would be considered shocking for medical staff to accept a significant infant fatality rate It s also inconceivable that a hospital would have a successful delivery target much below 100% How could anything else be acceptable in this day and age Yet there is an expectation and acceptance of baked in educational failure for around a third of 16 year olds in UK schools each year Such outcomes need addressing and this book does just that In *Obstetrics for Schools* Rachel Macfarlane draws on her experience as a head teacher and system leader to share a multitude of practical strategies for overcoming potential barriers to success presenting case studies and examples of effective practice from schools across the country The book illustrates an up to date and research informed picture of the current state of the education system and offers sage guidance on how schools can do more for each and every student In doing so Rachel provides a range of fresh approaches to school provision which have been proven to have an impact in a variety of challenging contexts Each chapter focuses on a key potential barrier to success and offers school leaders and practitioners a range of strategies to help dismantle them The book also provides guidance on strategic planning as well as a variety of ideas and inspiration for staff training Suitable for school leaders and teachers in all phases from early years to sixth form and in both mainstream and special education
