Text Mining and Visualization Andrew Chisholm, Markus Hoffmann, 2016 **Text Mining, Web Mining, and Visualization Use Cases Using Open Source Tools** Markus Hofmann, Andrew Chisholm, 2015-12-15 This introductory book for text and web mining utilizes only open source tools to illustrate and teach unique use case applications. Each use case consists of a fully implemented application based on a real text web mining example. Data and clear instructions to implement the use case are provided in each chapter. Readers will investigate at least ten different tools such as R, RapidMiner, Knime, Natural Language Toolkit, Open NLP, GATE, Gephi, and ManyEyes to learn text visualization and novel techniques.

Text Mining for Information Professionals Manika Lamba, Margam Madhusudhan, 2022-04-21 This book focuses on a basic theoretical framework dealing with the problems, solutions, and applications of text mining and its various facets in a very practical form of case studies, use cases, and stories. The book contains 11 chapters with 14 case studies showing 8 different text mining and visualization approaches and 17 stories. In addition, both a website and a GitHub account are also maintained for the book. They contain the code, data, and notebooks for the case studies, a summary of all the stories shared by the librarians, faculty, and hyperlinks to open an interactive virtual RStudio Jupyter Notebook environment. The interactive virtual environment runs case studies based on the R programming language for hands-on practice in the cloud without installing any software. From understanding different types and forms of data to case studies showing the application of each text mining approaches on data retrieved from various resources, this book is a must-read for all library professionals interested in text mining and its application in libraries. Additionally, this book will also be helpful to archivists, digital curators, or any other humanities and social science professionals who want to understand the basic theory behind text data, text mining, and various tools and techniques available to solve and visualize their research problems.

Text Mining Taeho Jo, 2024-12-07 This popular book updated as a textbook for classroom use discusses text mining and different ways this type of data mining can be used to find implicit knowledge from text collections. The author provides the guidelines for implementing text mining systems in Java as well as concepts and approaches. The book starts by providing detailed text preprocessing techniques and then goes on to provide concepts, the techniques, the implementation, and the evaluation of text categorization. It then goes into more advanced topics including text summarization, text segmentation, topic mapping, and automatic text management. The book

features exercises and code to help readers quickly learn and apply knowledge Presents an array of updated techniques for preprocessing texts into structured forms geared for classroom use Outlines concepts of text categorization and clustering their algorithms and implementation guides Includes advanced topics such as text summarization text segmentation topic mapping and automatic text management
