Reddit This Month Tutorial:

An Introduction to Web Mining Ulrich Matter, 2025-09-08 This book is devoted to the art and science of web mining showing how the world's largest information source can be turned into structured research ready data. Drawing on many years of teaching graduate courses on Web Mining and on numerous large scale research projects in web mining contexts the author provides clear explanations of key web technologies combined with hands on R tutorials that work in the real world and keep working as the web evolves. Through the book readers will learn how to scrape static and dynamic JavaScript heavy websites use web APIs for structured data extraction from web sources build fault tolerant crawlers and cloud based scraping pipelines navigate CAPTCHAs rate limits and authentication hurdles integrate AI driven tools to speed up every stage of the workflow apply ethical legal and scientific guidelines to their web mining activities. Part I explains why web data matters and leads the reader through a first hello scrape in R while introducing HTML HTTP and CSS. Part II explores how the modern web works and shows step by step how to move from scraping static pages to collecting data from APIs and JavaScript driven sites. Part III focuses on scaling up building reliable crawlers dealing with log ins and CAPTCHAs using cloud resources and adding AI helpers. Part IV looks at ethical legal and research standards offering checklists and case studies enabling the reader to make responsible choices. Together these parts give a clear path from small experiments to large scale projects. This valuable guide is written for a wide readership from graduate students taking their first steps in data science to seasoned researchers and analysts in economics social science business and public policy. It will be a lasting reference for anyone with an interest in extracting insight from the web whether working in academia industry or the public sector.

[The Cryptopians](#) Laura Shin, 2022-02-22 The story of the idealists, technologists, and opportunists fighting to bring cryptocurrency to the masses. In their short history, Bitcoin and other cryptocurrencies have gone through booms, busts, and internecine wars, recently reaching a market valuation of more than 2 trillion. The central promise of crypto endures: vast fortunes made from decentralized networks not controlled by any single entity and not yet regulated by many governments. The recent growth of crypto would have been all but impossible if not for a brilliant young man named Vitalik Buterin and his creation Ethereum. In this book, Laura Shin takes readers inside the founding of this novel cryptocurrency network, which enabled users to launch their own new coins, thus creating a new crypto fever. She introduces readers to larger-than-life characters like Buterin, the Web3 wunderkind, his short-lived CEO Charles Hoskinson, and Joe Lubin, a former Goldman Sachs VP who became one of crypto's most well-known billionaires. Sparks fly as these outsized personalities fight for their piece of a seemingly limitless new business opportunity. This fascinating book shows the crypto market for what it really is: a deeply personal struggle to influence the coming revolution in money, culture, and power.
