*Surveillance Society* David Lyon, 2001 Personal data is collected from us all the time through identity numbers camera images or by other means such as fingerprint and retinal scans This book examines the constant computer based scrutiny of ordinary daily life for citizens and consumers as they participate in contemporary societies *Electronically Monitored Punishment* Mike Nellis, Kristel Beyens, Dan Kaminski, 2013-05-07 Electronic monitoring EM is a way of supervising offenders in the community whilst they are on bail serving a community sentence or after release from prison Various technologies can be used including voice verification GPS satellite tracking and most commonly the use of radio frequency to monitor house arrest It originated in the USA in the 1980s and has spread to over 30 countries since then This book explores the

development of EM in a number of countries to give some indication of the diverse ways it has been utilized and of the complex politics which surrounds its use A techno utopian impulse underpins the origins of EM and has remained latent in its subsequent development elsewhere in the world despite recognition that it is less capable of effecting penal transformations than its champions have hoped This book devotes substantive chapters to the issues of privatisation evaluation offender perspectives and ethics Whilst normatively more committed to the Swedish model the book acknowledges that this may not represent the future of EM whose untrammelled commercially driven development could have very alarming consequences for criminal justice Both utopian and dystopian hopes have been invested in EM but research on its impact is ambivalent and fragmented and EM remains undertheorised empirically and ethically This book seeks to redress this by providing academics policy audiences and practitioners with the intellectual resources to understand and address the challenges which EM poses
