## **Supervision Essentials Integrative Developmental Clinical:**

**Supervision Essentials for the Integrative Developmental Model** Brian McNeill, Cal D. Stoltzenberg, 2015 Some clinicians use a simple master apprentice approach to supervision others utilize tools from their preferred model of psychotherapy. In this book Brian McNeill and Cal Stoltzenberg offer supervisors and trainees a different approach: their integrative developmental model of supervision. This empirically tested model incorporates elements of cognitive models, schema and skill development, interpersonal influence and social intelligence alongside models of human development to create a truly eclectic and time tested approach to clinical supervision. The authors model tracks therapists' development across all skill levels and theoretical orientations. Students and trainees are evaluated across domains of practice that include intervention skills, competence assessment techniques, individual differences, treatment plans and goals, and professional ethics among others. The authors provide clear guidelines for progression from beginner levels highly motivated trainees who remain highly dependent on the supervisor to more advanced supervisees who are better attuned to individual differences in clients and seek more sophisticated clinical responses all the way to master level therapists. The book also offers analyses of the authors' supervisory sessions with real clinical trainees including those documented in the companion DVD. The Integrative Developmental Model of Supervision. **A Manual for Evidence-Based CBT Supervision** Derek L. Milne, Robert P. Reiser, 2017-03-14 The effectiveness of CBT depends on the quality of the supervision and training that is provided to its practitioners. A Manual for Evidence-Based CBT Supervision is intended to significantly strengthen the available resources for training and supporting CBT supervisors. The authors drew on the insights of many accredited CBT supervisors to develop the guidance and the work is built firmly on an evidence-based approach. This manual will also be useful for individual supervisors and to those who support and guide trainers and supervisors e.g. peer groups, consultants, managers, administrators, training directors as the authors include training supervision guidelines and training materials e.g. video clips, guidelines and PowerPoint slides. In summary, this manual provides critical guidance in a number of areas: Training resources and evidence-based guidance to individual supervisors in a continuing education professional development workshop format; Criteria and guidance including measurement tools and competence standards to support the certification of supervisors; Assisting in a train-the-trainers approach suitable for agency or organization-based training of supervisors; Coaching and training supervisors and supervisees remotely through supplementary materials and an interactive website.
