Edited by
Vida Bajc

Surveilling Securing Olympics Transnational Security

Colin Bennett, Kevin Haggerty

Surveilling Securing Olympics Transnational Security:

Surveilling and Securing the Olympics Vida Bajc, 2016-04-29 This book analyses the relationship between the Olympic Games with its ethos of openness and collectivism and the security concerns and surveillance technologies that are becoming increasingly prevalent in the organisation of public events

International Security and the Olympic Games,

1972-2020 Austin Duckworth, 2022-08-24 Drawing on new archival documents and interviews this book demonstrates the evolving role of international politics in Olympic security planning Olympic security concerns changed forever following the terrorist attack on Israeli athletes at the 1972 Munich Olympic Games The International Olympic Committee's IOC choice to ignore security after the attack in Munich left individual Olympic Games Organizing Committees to organize fund and provide security for the major international event Future Olympic hosts planned security amidst increasing numbers of international terrorist attacks and with the Cold War in full swing For some Olympic hosts Olympic security now represented their nation's largest ever military operations By the time the IOC made security more of a priority in the early 1980s the trends in Olympic security were set for the future

Security Games Colin Bennett, Kevin Haggerty, 2012

Security Games Colin Bennett, Kevin Haggerty, 2012 Security Games Surveillance and Control at Mega Events addresses the impact of mega events such as the Olympic Games and the World Cup on wider practices of security and surveillance Mega Events pose peculiar and extensive security challenges The overwhelming imperative is that nothing should go wrong There are however an almost infinite number of things that can go wrong producing the perceived need for pre-emptive risk assessments and an expanding range of security measures including extensive forms and levels of surveillance These measures are delivered by a security industrial complex consisting of powerful transnational corporate governmental and military actors eager to showcase the latest technologies and prove that they can deliver spectacular levels of security Mega events have thus become occasions for experiments in monitoring people and places And as such they have become important moments in the development and dispersal of surveillance as the infrastructure established for mega events are often marketed as security solutions for the more routine monitoring of people and places Mega events then now serve as focal points for the proliferation of security and surveillance They are microcosms of larger trends and processes through which as the contributors to this volume demonstrate we can observe the complex ways that security and surveillance are now implicated in unique confluences of technology institutional motivations and public private security arrangements As the exceptional conditions of the mega event become the norm *Security Games* Surveillance and Control at Mega Events therefore provides the glimpse of a possible future that is more intensively and extensively monitored

Jane's Defence Weekly, 1989-07

Business Week, 2005

Security Games Colin Bennett, Kevin Haggerty, 2012-01-01

Security Games Surveillance and Control at Mega Events addresses the impact of mega events such as the Olympic Games and the World Cup on wider practices of security and surveillance Mega Events pose peculiar and extensive security challenges The overwhelming imperative is that nothing should go wrong There are however an almost

infinite number of things that can go wrong producing the perceived need for pre-emptive risk assessments and an expanding range of security measures including extensive forms and levels of surveillance. These measures are delivered by a security industrial complex consisting of powerful transnational corporate governmental and military actors eager to showcase the latest technologies and prove that they can deliver spectacular levels of security. Mega events have thus become occasions for experiments in monitoring people and places. And as such they have become important moments in the development and dispersal of surveillance as the infrastructure established for mega events are often marketed as security solutions for the more routine monitoring of people and places. Mega events then now serve as focal points for the proliferation of security and surveillance. They are microcosms of larger trends and processes through which the contributors to this volume demonstrate we can observe the complex ways that security and surveillance are now implicated in unique confluences of technology institutional motivations and public private security arrangements. As the exceptional conditions of the mega event become the norm *Security Games Surveillance and Control at Mega Events* therefore provides the glimpse of a possible future that is more intensively and extensively monitored.

Mass Gatherings and Public Health

World Health Organization. Regional Office for Europe, 2007. Large scale mass gatherings such as the Olympic Games represent significant challenges for the entire health sector of host countries. Emerging global public health threats of natural or deliberate nature increase considerably the health and safety vulnerability of mass gatherings. Major areas of public health responsibility include health care capacity and mass casualty preparedness, disease surveillance and outbreak response, environmental health and food safety, public information and health promotion, public health preparedness and response to incidents potentially involving the deliberate use of explosives, biological and chemical agents or radionuclear material and leadership operations and unified command. This book comprehensively and systematically presents the experience of and lessons learned from the public health aspects of the preparations and conduct of the Athens 2004 Olympic Games. Documenting this experience can be a source of valuable information and knowledge for governments at all levels and communities in building their capacity for not only large scale events but also preparing to deal with the avian influenza pandemic threat or other emergencies such as flooding and phenomena often associated with climate change.
