Mary Corbin Sies, Isabelle Gournay, Robert Freestone, 2019-08-23 In the history of planning the design of an entire community prior to its construction is among the oldest traditions Iconic Planned Communities and the Challenge of Change explores the twenty first century fortunes of planned communities around the world Drawing on interdisciplinary perspectives the editors and contributors examine what happened to planned communities after their glory days had passed and they became vulnerable to pressures of growth change and even decline Beginning with Robert Owen s industrial village in Scotland and concluding with Robert Davis s neotraditional resort haven in Florida this book documents the effort to translate optimal design into sustaining a common life that works for changing circumstances and new generations of residents Basing their approach on historical research and practical on the ground considerations the essayists argue that preservation efforts succeed best when they build upon foundational planning principles address landscape architecture and social engineering together and respect the spirit of place Presenting twenty three case studies located in six continents each contributor considers how to preserve the spirit of the community and its key design elements and the ways in which those elements can

be adapted to contemporary circumstances and changing demographics Iconic Planned Communities and the Challenge of Change espouses strategies to achieve critical resilience and emphasizes the vital connection between heritage preservation equitable sharing of the benefits of living in these carefully designed places and sustainable development Communities Bat ovany Partiz nske Cit Frug s Colonel Light Gardens Den en Ch fu Garbatella Greenbelt Hampstead Garden Suburb Jardim Am rica Letchworth Garden City Menteng New Lanark Pacaemb Radburn Riverside R merstadt Sabaudia Seaside Soweto Sunnyside Gardens Tapiola The Uplands Welwyn Garden City Wythenshawe Contributors Arnold R Alanen Carlos Roberto Monteiro de Andrade Sandra Annunziata Robert Freestone Christine Garnaut Isabelle Gournay Michael Hebbert Susan R Henderson James Hopkins Steven W Hurtt Alena Kubova Gauch Jean Fran ois Lejeune Maria Cristina a Silva Leme Larry McCann Mervyn Miller John Minnery Angel David Nieves John J Pittari Jr Gilles Ragot David Schuyler Mary Corbin Sies Christopher Silver Andr Sorensen R Bruce Stephenson Shun ichi J Watanabe *Heritage Planning* Harold Kalman, Marcus R. Moral Geographies David Marshall Smith, 2000 This book explores the interface between geography ethics and morality It considers questions that have haunted the past are subjects of controversy in the present and which affect the future Does distance diminish responsibility Should we interfere with the lives of those we do not know Is there a distinction between private and public space Which values and morals if any are absolute and which cultural communal or personal And are universal rights consistent with respect for difference David Smith shows how these questions play themselves out in politics planning development social and personal relations the exploitation of resources and competition for territory After introducing the essential elements of moral philosophy from Plato to postmodernism he examines the moral significance of concepts of landscape location and place proximity distance and community space and territory justice and nature He is concerned above all with the morality people practice to see how this varies according to geographical context and to assess the inevitability of its outcomes His argument is seamlessly interwoven with everyday observation and vividly described case studies the latter include genocide and rescue during the Holocaust the conflicts over space between Israel and Palestine and within Israel itself and the social tensions and aspirations in post apartheid South Africa The meaning possibility and limits of social justice lie at the heart of the book That geographical context is vital to the understanding of moral practice and ethical theory is its central proposition The book is clearly and engagingly written The author has a student readership in mind but his book will appeal widely to geographers and others involved in planning development politics social theory and the analysis of the contemporary world **Environmental Ethics** Louis P. Pojman, 2001 Organized into two main parts the first on theory and the second on applications the third edition of this popular anthology provides the most comprehensive set of readings available for environmental ethics and includes topic areas not covered in other anthologies The text follows a dialogic pro con format to present different and conflicting views on each topic Articles have been carefully selected for clarity and accessibility **ANTIQUITY**, 2000 **Environment Abstracts Annual**, 1992 This database encompasses all aspects of the impact of people and technology on the environment and the effectiveness of remedial policies and

technologies featuring more than 950 journals published in the U S and abroad The database also covers conference papers and proceedings special reports from international agencies non governmental organizations universities associations and private corporations Other materials selectively indexed include significant monographs government studies and newsletters
