Sustaining and Accelerating Pro-Poor Growth in Africa Mr.Kevin Joseph Carey,Mr.Sanjeev Gupta,Ms.Catherine A. Pattillo,2006-02-28 Growth in sub Saharan Africa has recently shown signs of improvement but is still short of levels needed to attain the Millennium Development Goals Economists have placed increasing emphasis on understanding the policies that promote sustained jumps in medium term growth and the paper applies this approach to African countries The evidence presented finds an important growth supporting role for particular kinds of institutions and policies but also highlights aspects of growth that are still not well understood The paper includes policy guidance for ensuring that the poor benefit from growth Sustaining and Accelerating Pro-Poor Growth in Africa Catherine A. Pattillo, Sanjeev Gupta, Kevin Joseph Carey, Kevin Carey, International Monetary Fund, 2006-02-28 This publication examines whether the improvements in economic growth in sub Saharan Africa since the mid 1990s are sustainable and explores which strategies have been most effective in contributing to poverty reduction objectives Topics considered include key factors which have contributed to the recent improvement in growth performance differences in performance across subgroups and countries in the region incidence and timing of growth accelerations links with changes in fiscal policy and financial development economic infrastructure and political institutions and lessons on the macroeconomic policies that have proved most effective for raising the incomes of the poor Accelerated Economic Growth in West Africa Diery Seck, 2015-07-07 The book provides a detailed analysis of the causes of West Africa s current economic high growth episode and proposes ways to extend it sustainably It examines the potential role of regional integration through the establishment of a common currency union and of other policy options that can enhance economic growth The authors suggest appropriate methods of coordination between macroeconomic policy and industrialization to achieve higher economic growth and also examine why pro poor strategies have not been successful The book underscores the challenges and opportunities that will arise from the structural change to the region s economies resulting from the necessary investment in manufacturing exports ICT and infrastructure which are key vehicles for extended growth Readers will learn how the region can better reach its developmental goals by securing and perpetuating political liberty and transactional freedom for all its citizens *Regional Economic Outlook, October 2008, Sub-Saharan Africa* International Monetary Fund. African Dept., 2008-10-10 Sub Saharan Africa s prospects have deteriorated somewhat and the risks have increased according to this report Growth in the region is projected to dip to 6 percent in 2008 and 2009 The fall is due mainly to the global food and fuel price shock which has weighed particularly on growth in oil importing countries and to the global financial market turmoil which has slowed global growth and demand for Africa s exports Inflation is expected to rise to 12 percent in 2008 mainly on account of the food and fuel price shock As a result of rising prices particularly of food poverty may well be on the increase in 2008 In 2009 inflation should ease to 10 percent helped by recent commodity price declines There are significant risks to the outlook related to a potentially deeper

and longer period of global financial turmoil and resulting slowdown in global activity and substantial uncertainty concerning commodity prices
