## **Supplementary Protection Certificates Marco Stief:**

**SPC - Supplementary Protection Certificates** Marco Stief, Dirk Bühler, 2013 *Blocking Patents in European Competition Law* Angelika S. Murer, 2021-12-03 In practice and jurisprudence in European competition law it is especially difficult to define the boundaries of patent abuse as an offence In this thoroughly researched book the author answers the question of when and how an application for a blocking patent can amount to an abuse of a dominant position under Article 102 TFEU Drawing on legal literature and European Union EU case law the presentation analyses a constellation of blocking patenting strategies and proposes potential remedies where abuse is involved With detailed descriptions of the characteristics of potentially abusive and non abusive behaviour regarding applications for blocking patents the book provides the following and more a comprehensive analysis of the case law of the EU courts on the abuse of a dominant position in cases which involve intellectual property rights insights on how patenting strategies affect competition with a particular focus on the application of blocking patents an overview of the developments in doctrine and practice which led to the current understanding of the seemingly conflictual goals of competition and intellectual property law and insights on the difficulties of defining relevant markets and establishing whether an undertaking holds a dominant position The book illustrates the mechanisms of blocking patenting strategies with examples from the pharmaceutical industry because blocking strategies have particular relevance in applying for patents in that context A test scheme for analysing the application of a blocking patent under Article 102 TFEU is included Additionally the book provides an outlook on the topic of patents and shortages of supply in light of the COVID pandemic Practitioners and policymakers requiring an understanding of the conceptual framework of the abuse concept within EU competition law and how it relates to patent strategies will welcome this invaluable book They will not only be able to set the conduct of applying for blocking patents into the Article 102 TFEU context but also have decisive tools to approach questions on the intersection of patent law and competition law in the EU

*Supplementary Protection Certificates* Marco Stief, Dirk Bühler, 2016-01-14 The supplementary protection certificate SPC prolongs the term of patents for pharmaceutical products for a maximum of five additional years The SPC s legal bases are two European SPC Regulations and the SPC is based upon European or national patents SPCs protect some of the most valuable products in the pharmaceutical industry where each day of additional protection may be worth millions of Euros Despite the economic relevance SPCs have obtained in recent years there exists only limited detailed literature on the subject German jurisprudence on SPCs is of special importance as this has often been the basis for decisions of the European Court of Justice ECJ and the German market is one of the leading markets for pharmaceuticals and thus for SPCs This book is addressed to patent attorneys in particular in house and external working for pharmaceutical companies and attorneys at law specialising in patent law especially in Europe but essentially worldwide

**The Unitary Patent Package & Unified Patent Court** Luc Desaunettes-Barbero, Fernand de Visscher, Alain Strowel, Vincent Cassiers, 2023-06-09 As of 1st of June

2023 after years of negotiations setbacks and postponements the Unitary Patent Package UPP enters into force the European patent with unitary effect EPUE becomes a reality and the Unified Patent Court UPC starts its activities Regrettably the patent regime put in place is not a genuine EU system Adopted through an enhanced cooperation procedure it firstly does not include all EU Member States Secondly the conditions and the procedure for granting EPUE is in the hands of the European Patent Office an international organization to which EU is not a party Lastly the substantive provisions and the litigation proceedings are defined by an international treaty the UPC Agreement to which EU is not a member and by national laws for the remaining aspects Such system carves patent law out of the EU legal and judicial orders and reduces the roles of the EU Parliament and Court of Justice Challenges are numerous in terms of complexity harmonization objectives legality business advantages and wider societal economic and legal concerns to name a few With twenty eight contributions from academics and practitioners this book starts with putting the new system into historical comparative and institutional contexts Part I before highlighting some issues under EU law and the perspective of EU integration Part II The institutional jurisdictional and procedural questions raised by the UPC are then addressed Part III as well as the innovation and markets issues Part IV The last contributions discuss possible improvements and alternatives to the Unitary Patent Package Part V

Supplementary Protection Certificates (SPC) Johann Pitz, Atsushi Kawada, Jeffrey A. Schwab, 2021 The book provides a comparative overview on patent law and patent litigation proceedings in Germany Japan and the United States The systematic presentation of the legal systems including comprehensive references reveals differences and similarities Page v
