New Natural Home Dominic Bradbury, 2011-04-12. Inspirational houses from around the world show how architects and home owners can achieve harmony between dwellings and nature. Our houses can be seen as living, breathing entities, extensions of ourselves and our families. This carefully considered publication provides the design inspiration to build and live in domestic spaces in a balanced, natural, sustainable way. With the demands of all contemporary dwellings in mind, whether they're found in the city, suburbs, or country, Dominic Bradbury considers the design basics one must follow in order to coexist with the planet's resources. Five chapters present successful projects from different parts of the globe, all specially photographed by Richard Powers. Design and Build: where and how to create a modern natural home. Let There Be Light: manipulating the elements to improve lifestyle and interaction with nature. The Material World: using natural products to establish healthier relationships with the environment. Indoor/Outdoor Living: ideas for encouraging symbiotic relationships with the landscape, whether in the city or the country. Sustainable Footprints: how to naturally reduce domestic energy use. The book includes case studies and plans, a directory of architects, and a listing of featured houses, materials, and useful products.

The Specification and Use of Sustainable Flooring Materials by Interior Designers in Residential Design Practice Bo Kyung Kim, 2009.

New Eco Homes Manel Gutierrez, 2015-11-10. A stunning full-color showcase of the latest innovations in sustainable architecture and eco-friendly design, featuring thirty-five diverse homes. Today's architects, designers, building craftsmen, and homeowners are becoming more environmentally conscious, choosing eco-friendly living spaces with small carbon footprints that are built with sustainable materials. New Eco Homes explores various aspects of modern eco design, from its environmental and economical benefits to factors considered when choosing materials, how much energy went into manufacturing the product, whether it is long-lasting, and whether it can be recycled or safely disposed of as it eventually breaks down. It also examines important details involved in building, such as climate regulation, drainage systems, and regional planning. Each of the thirty-five projects contains photographs, floor plans, and detailed drawings that illustrate certain sustainable features, revealing how much the parameters of ecological design have expanded in just a few short years. New Eco Homes includes an introductory interview with an international specialist in green building, site plans, architectural drawings, and a complete directory of resources. Combining concern for the

environmental with aesthetic sensibility it is an essential resource for architects designers and homeowners interested in creating warm and inviting homes that are not only beautiful to inhabit but help protect and conserve our natural environment as well
