To Touch and to Cut Hilke Kurzke, 2009 This book does not seem to be a book in the usual sense at all since its pages cannot be leafed through Instead a shape opens up that might remind the viewer of a flower On the white leaves red lines are visible that add depth to the milky white shine through pages The leaves are part of one long folded strip of parchment paper that is not attached to the book case and can easily be removed Taken out of its covers it becomes apparent that this strip is folded in an ordinary accordion style Hold the folded block against a light source and you ll see that the red lines across the pages are not random they are all tangent to i e are touching a common circle At the same time and less apparent all these lines also cut a larger circle with the same center In fact they each cut such circle and with the circle being not uniquely determined you cannot see it as the touched circle These larger circles are invisible and you have to know they are there to know that the touching lines are also cutting artist s statement
