GPT-3 Sandra Kublik, Shubham Saboo, 2022-07-11. GPT 3 NLP with LLMs is a unique pragmatic take on Generative Pre-trained Transformer 3, the famous AI language model launched by OpenAI in 2020. This model is capable of tackling a wide array of tasks like conversation, text completion, and even coding, with stunningly good performance. Since its launch, the API has powered a staggering number of applications that have now grown into full-fledged startups generating business value. This book will be a deep dive into what GPT 3 is, why it is important, what it can do, what has already been done with it, how to get access to it, and how one can build a GPT 3-powered product from scratch. This book is for anyone who wants to understand the scope and nature of GPT 3. The book will evaluate the GPT 3 API from multiple perspectives and discuss the various components of the new burgeoning economy enabled by GPT 3. This book will look at the influence of GPT 3 on important AI trends like creator economy, no-code, and Artificial General Intelligence, and will equip the readers to structure their imaginative ideas and convert them from mere concepts to reality.

This exploration encompasses applications of advanced generative AI tools, language models and innovative technologies specific to diverse businesses across sectors, scales and regions. It emphasizes that as AI becomes more seamlessly integrated into business processes, the potential for multifactor productivity to fuel economic growth, new industries and job opportunities is unparalleled. **Human + Machine, Updated and Expanded** Paul R. Daugherty, H. James Wilson, 2024-09-10. AI including generative AI is radically transforming business. Are you ready? Accenture technology leaders Paul Daugherty and Jim Wilson provide crucial insights and advice to help you meet the challenge. Look around you. Artificial intelligence is no longer just a futuristic notion. It's here right now, in software that senses what we need, supply chains that think in real time and now generative AI that is radically reshaping work and productivity. Twenty-first century pioneer companies are already using AI to innovate and grow fast. The bottom line is this: Businesses that understand how to harness AI can surge ahead. Those that neglect it will fall behind. Which side are you on? In this updated and expanded edition of *Human Machine* including a new chapter on gen AI, Accenture technology leaders Paul Daugherty and Jim Wilson show that the essence of the AI paradigm shift is the transformation of all business processes within an organization, whether related to breakthrough innovation, everyday customer service or personal productivity habits. As humans and smart machines collaborate ever more closely, work processes become more fluid and adaptive, enabling companies to change them on the fly or completely reimagine them. Based on the authors' experience and research with fifteen hundred organizations, the book reveals how companies are using the new rules of AI to leap ahead on innovation and profitability and what you can do to achieve similar results. It describes six entirely new types of hybrid human machine roles that every company must develop and it includes a leader's guide with the five crucial principles required to become an AI-fueled business. **Human Machine** provides the missing and much-needed management playbook for success in the new age of AI. **Supremacy** Parmy Olson, 2024-09-10. WINNER OF THE THE FINANCIAL TIMES AND SCHRODERS 2024 BUSINESS BOOK OF THE YEAR AWARD. In November of 2022, a webpage was posted online with a simple text box. It was an AI chatbot called ChatGPT and was unlike any app people had used before. It was more human than a customer service agent, more convenient than a Google search. Behind the scenes, battles for control and prestige between the world's two leading AI firms, OpenAI and DeepMind, who now steers Google's AI efforts, has remained elusive until now. In *Supremacy*, Olson, a tech writer at Bloomberg, tells the astonishing story of the battle between these two AI firms, their struggles to use their tech for good and the hazardous direction they could go as they serve two tech Goliaths whose power is unprecedented in history. The story focuses on the continuing rivalry of two key CEOs at the center of it all, who cultivated a religion around their mission to build god-like super intelligent machines. Sam Altman, CEO of OpenAI, and Demis Hassabis, the CEO of DeepMind. *Supremacy* sharply alerts readers to the real threat of artificial intelligence that its top creators are ignoring: the profit-driven spread of flawed

and biased technology into industries education media and more With exclusive access to a network of high ranking sources Parmy Olson uses her 13 years of experience covering technology to bring to light the exploitation of the greatest invention in human history and how it will impact us all *Selling and Negotiation Skills* Prashant Chaudhary,2024-10-17 This book is a complete guide to learning the critical selling and negotiation skills to gain a competitive edge in a challenging business environment The volume covers various negotiation approaches strategies tactics and styles that are adaptable and compatible with emerging business models and technologies Businesses worldwide are adapting to changing consumer behaviour and focusing on more sustainable and future ready selling and negotiation strategies Richly illustrated with examples from diverse domains and real life situations for an easy understanding of the subject this book looks at strategies tactics and styles for negotiation and the tools or technologies used for effectively selling business cases and scenarios that illustrate the direct application of concepts making the book practical accessible and relevant and customer centric selling and negotiation strategies processes and approaches A valuable companion for students teachers research scholars and professionals working in sales business and management this revised edition will also be of interest to those working in the areas of global business and trade international affairs marketing and economics
