Based on a pioneering research programme on the evolution of top incomes this volume brings together studies from 10 OECD countries This rapidly growing field of economic research investigates the top segment of the income distribution by using data from income tax records over the past century As well as describing the source data and methods employed the authors also discuss the dramatic changes that have occurred at the top of the income scale throughout the 20th century This fascinating study is the first of its kind to provide a comprehensive historic overview of top income distribution over the last century It looks at why top incomes shares fell markedly in the first half of the 20th century and why more recently there has been a striking difference in the top income distribution between continental Europe and English speaking OECD countries like the UK USA and Australia Written by the top names in the field this seminal work provides rich pickings for those with an interest in inequality development the economic impact of war taxation economic history and executive compensation

**Decision Synthesis** Victor Tang,Kevin Otto,Warren Seering,2018-09-03 This book provides a practice driven yet rigorous approach to executive management decision making that performs well even under unpredictable conditions It explains how executives can employ prescribed engineering design methods to arrive at robust outcomes even when faced with uncontrollable uncertainty The book presents the paradigm and its main principles in Part I in Part II it illustrates how to frame a decision situation and how to design the decision so that it will produce its intended behavior In turn Part III discusses in detail in situ case studies on executive management decisions Lastly Part IV summarizes the book and formulates the key lessons learned      *Closing the tax gap* Great Britain: Parliament: House of Commons: Treasury Committee,2012-03-09 This Treasury Committee report considers HM Revenue Custom s past work in ensuring tax compliance and concludes that while progress has been made there is still work to be done HMRC defines the tax gap as the difference between tax collected and the tax that should be collected the theoretical liability The theoretical tax liability

represents the tax that would be paid if all individuals and companies complied with both the letter of the law and HMRC's interpretation of the intention of Parliament in setting law referred to as the spirit of the law Enabling voluntary compliance is the most efficient way of closing the tax gap and HMRC must ensure that all those who wish to comply with their tax obligations are able to do so Part of the process of encouraging voluntary compliance is demonstrating that HMRC treats all taxpayers fairly whether they are individuals small businesses or large corporations The tax system should be simplified to make compliance easier HMRC's recent announcement of ways it intends to improve its processes for settling tax disputes is a step forward in the context of wider questions needing to be answered about the accountability structures of HMRC HMRC's calculation of the tax gap is flawed and risks focusing the minds of its employees on the wrong task maximising revenue at all cost rather than ensuring that all taxpayers pay the right amount of tax
