A brief study** Serafeim A. Triantafyllou,2020-10-06 Essay from the year 2014 in the subject Didactics E Learning grade 10 University of Macedonia language English abstract This study investigates the second generation of the World Wide Web called Web 2 0 The revolution of Web 2 0 over Web 1 0 was that it allowed Internet users not to be passive recipients who simply read the digital content of a web page but enabled them to add digital content share information and collaborate online The blast of Web 2 0 is therefore largely based on the electronic sharing of knowledge and information In this paper the basic features of Web 2 0 its basic services functions and tools will be firstly described Next concepts such as social networking services and social networks will be analyzed and the application of Web 2 0 in education as well as the benefits it can bring will be studied In conclusion a summary of the possibilities of Web 2 0 is made and the advantages disadvantages and its role in the educational process are presented through a critical point of view One of the major differences between Web 2 0 and the traditional World Wide Web is the greater collaboration between Internet users and other users such as digital service providers and businesses While Web 1 0 was software organized around pages technologies and businesses Web 2 0 was organized around ordinary people and services In the Web 1 0 era internet users had the ability to read the digital content of a web page but could not create their own since the only person who could update the web page content was its webmaster In other words we would say that Web 1 0 was not oriented towards the creation of digital content by internet users Technological Developments in Networking, Education and Automation Khaled Elleithy,Tarek Sobh,Magued Iskander,Vikram Kapila,Mohammad A. Karim,Ausif Mahmood,2010-06-18 Technological Developments in Networking Education and Automation includes a set of rigorously reviewed world class manuscripts
