T.

Wilson, 2004 This book addresses and at the same time reflects the impact of Max Weber on both the social sciences and on critical theory's critique of the social sciences. Weber's conception of vocation is a guiding thread unifying concerns about the nature, scope and limits of theoretical thinking among social scientists, whether supportive or critical of Weber. Not surprisingly, the source of many of these concerns, whether intended or unintended, biographical or situational, is the ambiguous legacy of Weber himself. Wilson's interrogation of Weber's thought in articles and essays over the past 30 years, supplemented by Kempler's insights, makes a strong case for the claim that we do indeed live in the age of Weber.
