**The Face of the Other in Anglo-American Literature** Marija Knežević, 2011-09-22 If we have established that our approach to the phenomena that are other to us is always a matter of semiosis and that even in an attempt to naturalize phenomenology like the one made by Maurice Merleau Ponty who points to the corporeity of consciousness as much as an intentionality of the body it appears that our most negligible movements present our cultural being or habituality of Iris Young Throwing Like a Girl 1990 2005 However many thinkers have claimed for example the novelist D H Lawrence or philosopher Luce Irigaray that we know by touch and intuition The papers collected in this book examine our approach to these issues in an essentially post theory world particularly enquiring if twentieth century theory has left us clear directions of where we are supposed to be looking for new ways of understanding and representing the phenomenological The way the Other exists in the consciousness that as Hegel said always pursues its death becomes especially interesting in the context of the development of Anglo American studies in the post postmodern world which sees the West as a changeable cultural and geographical concept that incorporates a multiplicity of others Yet at the same time a number of contemporary Anglo American writers insists on the prolonged effects of colonialism in the modern world in which outbursts of violence and hatred aimed at the Other prove that the modern world still cannot approach the Other without bigotry

**Public Archaeology for the Twenty-First Century** James F. Brooks,Jeremy M. Moss,2025-06 In Public Archaeology for the Twenty First Century James F Brooks and Jeremy M Moss have collected essays from twenty seven scholars and community members to illuminate archaeological sites like ancient water courts at Mound Key in Florida the lost Black cemetery at Nashville Zoo fur trade era Fort Michilimackinac and Arizona s Gila Bend Internment Camp Each case offers readers an experience that enlivens the past while speaking to the present These essays wrestle with key tensions in the field of public archaeology What do we mean by public Is this site public facing or public participating Does public simply imply simplifications in scholarly rigor or does it require more creative attention to methods of analysis and interpretation to render stories sensible for those beyond the academy In the broadest sense these chapters explore the relationship between archaeological practice the representation of archaeology and history and our varied publics This requires not only consultation with varied stakeholders but also collaborative partnerships with descendant communities who have direct connections to the heritage resources we wish to share

Origins, Foundations, Sustainability and Trip Lines of Good Governance: Archaeological and Historical Considerations Gary M. Feinman,Richard Edward Blanton,Stephen A. Kowalewski,Lane Fargher Navarro,2022-10-05 Until recently scholarly consensus across the social sciences and history adhered to the view that the incorporation of citizen voice in governance e g democracy was an entirely Western phenomenon that mostly is a product of the emergence of rational thought and the modern world These views are now empirically questioned and subject to serious reconsideration Yet even researchers who recognize a broader temporal span for democratic or good governance draw fundamental distinctions between these political forms in the past and present Building on the collective action theories in particular those focused on fiscal financing the editors of this Research Topic outline fundamental characteristics internal financing equitable taxation checks on power and a functioning bureaucracy at the core of good governance which are neither the sole project of the contemporary West nor tied to any specific ideological construct or form of leadership Even elections can no longer be conceived as assurance of good governance At this time of global challenges to democracy understanding the comparative history of good governments their core institutions how they worked their foundations what led to their downfalls and the factors that prompted their sustenance or their collapses are extremely important to document The historical trends and

coactive processes that underpinned those human cooperative arrangements which fostered growth and general well being require comparative focus if we are to draw on the wealth of human history to help craft better governance in the future and forestall the tripwires that lead to its failures We welcome contributions which focus on Diachronic examinations of changes in the fiscal foundations of governance and their impacts on governance Comparative analysis of governmental variability and its relationship to collective action and its fiscal financing Cross temporal studies of shifts in the degree of good governance and relations to inequality sustainability bureaucracy public goods and services and fiscal financing The importance of social compacts and contracts in representative government and how these are sustained and break down Alternatives and supplements to elections as means of assessing subaltern voices The relationship between governance and inequality over time and across space Differences in modes of political collapse and their relationship to governance fiscal financing and responses of principals The role of public ritual in good versus autocratic governments Variance in communication and computation in good versus autocratic governments The relationship between comparative governance and the uses and spatial distributions of community urban space residential and non residential architecture sprawl versus compact settlement The relationship between comparative governance and neighborhood organization Was there one or many episodes of enlightenment The relationship between governance and coactive processes including considerations of demographic growth patterns of migration well being economic growth The relationship between slave labor and governance spot resources and governance Non hierarchical and egalitarian forms of governance in non state societies Indigenous inspirations and influences on the Constitution of the United States Collective action and establishment of early cities Our aim for this Research Topic is to compile a series of research essays drawn from a broad cross regional and cross temporal sample of historical settings to explore issues and themes relevant to the history and processes that have been at the heart of good governance
