Bull,2017-09-11 Bible based this book demonstrates that an important element of 21st century Christian faith is about engaging with the big challenges of climate change and sustainable living **T&T Clark Handbook of Christian Theology and Climate Change** Hilda P.

Koster, Ernst M. Conradie, 2019-12-12 The T these essays are critically engaged by respondents situated in other geographic regions minority communities non Christian traditions or non theological disciplines Structured in seven main parts the handbook explores 1 the need for collaboration with disciplines outside of Christian theology to address climate change 2 the need to find common moral ground for such collaboration 3 the difficulties posed by collaborating with other Christian traditions from within 4 the questions that emerge from such collaboration for understanding the story of God s work and 5 God s identity and character 6 the implications of such collaboration for ecclesial praxis and 7 concluding reflections examining whether this volume does justice to issues of race gender class other animals religious diversity geographical divides and carbon mitigation This rich ecumenical cross cultural conversation provides a comprehensive and in depth engagement with the theological and moral challenges raised by anthropogenic climate change *A Climate for Change*

Katharine Hayhoe, Andrew Farley, 2009-10-29 Most Christian lifestyle or environmental books focus on how to live in a sustainable and conservational manner A CLIMATE FOR CHANGE shows why Christians should be living that way and the consequences of doing so Drawing on the two authors experiences one as an internationally recognized climate scientist and the other as an evangelical leader of a growing church this book explains the science underlying global warming the impact that human activities have on it and how our Christian faith should play a significant role in guiding our opinions and actions on this important issue *Christianity, Climate Change and Sustainable Living* Nick Spencer, Robert White, 2007 This book represents the first serious Christian engagement with the emerging issue of sustainable consumption and production Spencer and White analyse the scientific sociological economic and theological thinking that makes a Christian response to these trends both imperative and distinctive Their practical conclusions explore what can be done at the personal community national and international levels to make sustainable living a reality Firmly rooted in the good news of the Christian faith this is above all a constructive and hopeful book that offers a realistic vision of a better future Book Jacket **Science, Faith and the Climate Crisis**

Between God & Green Katharine K. Wilkinson, 2012-04-01 Despite three decades of scientists warnings and environmentalists best efforts the political will and public engagement necessary to fuel robust action on global climate change remain in short supply Katharine K Wilkinson shows that contrary to popular expectations faith based efforts are emerging and strengthening to address this problem In the US perhaps none is more significant than evangelical climate care Drawing on extensive focus group and textual research and interviews Between God Green explores the phenomenon of climate care from its historical roots and theological grounding to its visionary leaders and advocacy initiatives Wilkinson examines the movement s reception within the broader evangelical community from pew to pulpit She shows that by

engaging with climate change as a matter of private faith and public life leaders of the movement challenge traditional boundaries of the evangelical agenda partisan politics and established alliances and hostilities These leaders view sea level rise as a moral calamity lobby for legislation written on both sides of the aisle and partner with atheist scientists Wilkinson reveals how evangelical environmentalists are reshaping not only the landscape of American climate action but the contours of their own religious community Though the movement faces complex challenges climate care leaders continue to leverage evangelicalism's size dominance cultural position ethical resources and mechanisms of communication to further their cause to bridge God and green

*A New Climate for Theology* Sallie McFague, 2008 A leading theologian's analysis of the root problems behind climate change Proposes a relational eco friendly notion of what it is to be human

**Christianity in a Time of Climate Change** Kristen Poole, 2020-04-17 What does climate change have to do with religion and spirituality Even though a changing environment will have a dire impact on human populations affecting everything from food supply to health to housing the vast majority of Americans do not consider climate change a moral or a religious issue Yet the damage of climate change a phenomenon to which we all contribute through our collective carbon emissions presents an unprecedented ethical problem one that touches a foundational moral principle of Christianity Jesus's dictate to love the neighbor This care for the neighbor stretches across time as well as space We are called to care for the neighbors of the future as well as those of the present How can we connect the ethical considerations of climate change the knowledge that our actions directly or indirectly cause harm to others to our individual and collective spiritual practice Christianity in a Time of Climate Change offers a series of reflective essays that consider the Christian ethics of climate change and suggest ways to fold the neighbors of the future into our spiritual lives as an impetus to meaningful personal social and ultimately environmental transformations

**Systematic Theology and Climate Change** Michael S. Northcott, Peter M. Scott, 2014-06-05 This book offers the first comprehensive systematic theological reflection on arguably the most serious issue facing humanity and other creatures today Responding to climate change is often left to scientists policy makers and activists but what understanding does theology have to offer In this collection the authors demonstrate that there is vital cultural and intellectual work for theologians to perform in responding to climate science and in commending a habitable way forward Written from a range of denominations and traditions yet with ecumenical intent the authors explore key Christian doctrines and engage with some of the profound issues raised by climate change Key questions considered include What may be said about the goodness of creation in the face of anthropogenic climate change And how does theology handle a projected future without the human The volume provides students and scholars with fascinating theological insight into the complexity of climate change

*How the World's Religions are Responding to Climate Change* Robin Globus Veldman, Andrew Szasz, Randolph Haluza-DeLay, 2013-09-11 A growing chorus of voices has suggested that the world's religions may become critical actors as the climate crisis unfolds particularly in light of international paralysis on the issue In recent years many faiths have begun to

address climate change and its consequences for human societies especially the world's poor. This is the first volume to use social science to examine how religions are helping to address one of the most significant and far-reaching challenges of our time. While there is a growing literature in theology and ethics about climate change and religion, little research has been previously published about the ways in which religious institutions, groups, and individuals are responding to the problem of climate change. Seventeen research-driven chapters are written by sociologists, anthropologists, geographers, and other social scientists. This book explores what effects religions are having, what barriers they are running into or creating, and what this means for the global struggle to address climate change.
