The Theory Of Schizophrenic Negativism:

The Theory of Schizophrenic Negativism Eugen Bleuler, 1912 **The Theory of Schizophrenic Negativism** Eugen Bleuler, William A White, 2019-06-24 Eugen Bleuler's treatise on schizophrenia provides an important glimpse into the history of mental illness how psychiatric science came to understand, categorize and diagnose various types of psychosis. As the science and study of mental illness was formalized in the late 19th century, an understanding of the various types and subtypes of disorders emerged. Much headway was made into the identification of certain types of schizophrenia, the behaviors characterizing each of these, and the methods of arriving at an accurate diagnosis. It is thus that this paper, published by Bleuler in the early 20th century, represents a summation of the progress and an evolution in how psychosis is termed. Prior to the publication of Bleuler's papers, the word schizophrenia, adapted from the Greek words shattered and mind, had no place in psychology. Rather, the term Dementia praecox was used as a generalized description for psychosis. *The Theory of Schizophrenic Negativism* Paul Eugen Bleuler, 2018-05-22 The Theory of Schizophrenic Negativism is a classic work on schizophrenia by Dr E Bleuler, translated by William A White. Paul Eugen Bleuler (1857-1939) was a Swiss psychiatrist and eugenicist. He was most famous for his work in the field of understanding mental illness. He also coined a number of common psychiatric terms including schizophrenia, schizoid, and autism. Contents include: Ambitendency, Ambivalence, The Schizophrenic Splitting of the Psyche, The Lack of Clearness and Imperfect Logic of the Schizophrenic, Irrationality in the Schizoid Mind, Delusion and Hallucination, etc. This fascinating early work on the subject will appeal to those with an interest in psychology and the development of related ideas and theories. Many vintage books like this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume, now complete with the original text and artwork, for the enjoyment of readers now and for years to come. **The Theory of Schizophrenic Negativism** André Thomas, Eugen Bleuler, 1912 [The Theory of Schizophrenic Negativism \(1912\)](#) Eugen Bleuler, William White, 2016-09-11 Paul Eugen Bleuler (1857-1939) was a Swiss psychiatrist and eugenicist, most notable for his contributions to the understanding of mental illness and for coining the terms schizophrenia, schizoid, autism, and what Sigmund Freud called Bleuler's happily chosen term, ambivalence. This translation of the series of papers on the Theory of Schizophrenic Negativism by the gifted Swiss psychiatrist Bleuler is worthy of more than passing attention. The author here endeavors to explain the negativism which is found in dementia praecox or schizophrenia, as he prefers to term it. He critically reviews the various theories which have been offered and presents the elucidation of the problem in a penetrating, keen and brilliant manner. The monograph is brief and to the point. Every sentence counts. Bleuler here explains his well-known theory of psychic ambivalence and ambitendency. By ambivalence, he says, is to be understood the specific schizophrenic characteristic to accompany identical ideas or concepts at the same time with positive as well as negative feelings; affective ambivalence to will and not to will at the same time; the identical actions; ambivalence of the will and to think the same thoughts at once negatively and positively; intellectual

ambivalence Taking up the problem of negativism in particular Professor Bleuler gives the predisposing causes of negativistic phenomena The translation by White is very commendable and makes easy reading This monograph is highly recommended to all those who are interested in psychopathology or psychiatry and in the make up of the mind of man *THEORY OF SCHIZOPHRENIC NEGATIVISM* EUGEN.
