These strategies reduce the risk of infection and the transmission of pathogens and improve overall public health outcomes. Despite the challenges from antibiotic resistance, these approaches are effective in reducing bacterial load and can provide sustained immunity. Their implementation requires education, training, and collaboration between healthcare providers and the community to ensure success.

11. *What is the primary purpose of the following statement?*

Other studies among different countries and cultures have shown that the same factors influence quality of life and well-being among elderly people. These factors are: education, a healthy body, social groups, cultural areas, which are all interconnected, providing a comprehensive picture for understanding quality of life. Personal and environmental and family factors.
