period of the war itself which can shed light on Jewish responses to persecution and strategies for survival The study of Holocaust testimonies continues to grapple with the challenge of language how to convey through the limits of human language the depths of barbarity to an audience that could never fully understand what they had not personally experienced Likewise literary studies continue to incorporate texts that were once considered outside the standard canon of Holocaust literature such as science fiction and children s literature The tension between local and global perspectives can also be seen quite clearly in what the volume s editors understand by the term memory studies or new approaches to research on museums and memorials The very specific nature of collective memory on the national level continues to be the site of the contested politics of memory A number of the chapters in this volume engage with the conflict of monuments and memorials museums attempts to resolve provenance issues questions around the ethics of Holocaust tourism and the inclusion of new technologies and digital survivors into the memorial landscape
