**Make / Believe** John Hartley, 2025-01-23 This book illustrates that

mediated popular culture and science based knowledge systems entangled and compromised as both have become are still a robust crucible for system change for the future when they combine forces Planetary crises require responses from everyone This means that collective action is not simply a scientific or political problem It is a problem of culture and media But modern politics journalism and science were not designed for global climate action They've divided humans into competitive and often hostile we and they groups Identity news and knowledge are all weaponized Culture makes groups groups make knowledge and knowledge makes enemies What can be done to prevent global conflict and the drift to war Make Believe turns to popular culture and social media to argue for an alternative storyline While the Great Powers are making new enemies emergent classes led by children are using planetary connectivity to make new worlds A digital planet generates new kinds of strategic stories for pan human action based on difference intersectionality and cooperation for a sustainable Earth system Make Believe shows how alternatives to the Great Game of global contestation are gathering strength in unlikely places among women children lifestyle and pop culture Popular digital media literacy is now a prerequisite for the remediation of the planet

**Anesthesia for Trauma** Corey S. Scher, 2014-08-28 Trauma is the leading cause of death among people under the age of 40 and it ranks third for all age groups Still relatively few clinicians specialize in trauma and

training is often obtained through experience. The number of trauma patients is expected to continue to grow as pre hospital care continues to advance. As well hospitals increasingly see trauma treatment which requires no pre approval as a good source of revenue. Given these developments the number of opportunities for specialists trained in trauma including anesthesiologists and critical care physicians will expand in the years ahead. This book addresses the need for an up to date comprehensive and clinically focused volume for practitioners and trainees in trauma anesthesia and critical care. It is organized by organ system. The editor is an attending physician at a major urban hospital center recognized worldwide for its outstanding emergency medical services including trauma care and is recruiting leading trauma anesthesiologists to contribute. Anesthesiologists, pain medicine physicians, critical care physicians and trainees are the target audience. [Blood Safety](#) Hua Shan, Roger Y. Dodd, 2018-09-26. This book offers a concise yet comprehensive overview on critical issues in monitoring and responding to new microbial threats to blood safety. It provides information on the current concerns and mechanisms for monitoring potential new infectious threats to blood safety, evaluates the response to these new threats and explores the complex issues related to blood safety including health economics, the relationship between levels of public health threats, actual danger versus public concerns, perceived danger and the challenges in coordinating international collaborative efforts. The text also includes several case studies that illustrate the existing systems used for monitoring and responding to new threats to blood safety. Written by experts in the field, *Blood Safety: A Guide to Monitoring and Responding to Potential New Threats* is a valuable resource for health care professionals who are responsible for the medical management of blood services.
