The Thai Economy Routledge Studies In The Growth Economies Of Asia:

The Thai Economy Chris Dixon, 1998-12-03 This volume looks at the origins and consequences of the accelerated growth of the Thai economy since the mid 1980s and explores the factors that set Thailand apart from other Asian African and Latin American countries

Economic Growth and Development in the Tropics Sook Rei Tan, Haejin Jang, Jacob Wood, 2024-02-06 The living standards and scale of development around the world are vastly unequal. One notable observation is that much of the poverty-stricken area is located between the tropics of Cancer and Capricorn. By contrast, affluent nations are situated in more temperate zones. Such a phenomenon gives weight to the geography hypothesis that seeks to explain the occurrence of global economic inequality by placing an emphasis on the importance of natural elements such as location and climate in determining the economic conditions of a nation. This book concentrates exclusively and in depth on the key economic phenomena and factors which shape tropical economies today. It examines contemporary economic problems confronting the tropical countries and provides policy recommendations that align with the United Nations Sustainable Development Goals set in the 2030 Agenda. It contains research works and case studies of tropical economies that are related to the area of development and environment economics. The book's themes range from economic growth, poverty reduction, income inequality, economic globalization, international trade, capital flow, financial development, and institutional development to environmental sustainability within the Tropics. Recognizing the dynamism and diversity of the tropics, the book encompasses empirical and policy analyses that address the key economic issues and challenges in the region so as to provide an important platform from which new policymaking initiatives can flourish. This book will draw readership primarily from the fields of economics and public policy, particularly under the subject areas of development and environment economics, as well as discussions in the sustainability policy space.

State Structure, Policy Formation, and Economic Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't? What factors account for different economic performance among states that are vulnerable to external shocks, crony capitalism, and political instability? This book argues that the answer lies in the structuring of state power, specifically the way different sets of governing elites, political leaders, and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process. Conducting a comparative historical analysis of Thailand and the Philippines, the book argues that the institutional settings of governing elites influence economic outcomes. In Thailand, political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long-term industrial activities. In contrast, Philippine state power derives from family networks that merge social and political power suited to fast-moving short-term commercial interests. In focusing on this political and institutional story, the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes.
