The Timber Bubble That Burst Government Policy And The Bailout Of 1984:

The Timber Bubble that Burst Joe P. Matthey, 1990-11-15 This is a book about bubble prices and their consequences in the timber industry of the Pacific Northwest from 1979 1984 Bubble prices unusual and rapid rises and eventual drops in the prices of a commodity have been of theoretical interest to economists for many years This study examines the unusual movements in the price of federal timber and the subsequent recession in the Northwest when timber buyers delayed harvests in order to postpone the realization of their losses on the contracts Matthey argues that it was not so much the actions of the Federal Reserve which had been widely blamed for the crisis but rather the actions of the buyers themselves that caused the recession *The Economics of Nature and the Nature of Economics* Cutler J. Cleveland, David I.

Stern, Robert Costanza, 2001-01-01 The writing style is clear and sophisticated and the quality of production high Steve Harrison *Economic Analysis and Policy* what we have in this anthology is a very readable collection of well written articles which explore the limits of both conventional economic theory and new approaches For a general reader involved in sustainable development the book is a good compilation of current approaches The style and technical level in the articles makes this book usable at levels from undergraduate university through the governmental sectors Its broad range and readable style makes the collection a good working reference volume Edward J Linky *Natural Resources Forum* This book discusses important recent developments in the theory concepts and empirical applications of ecological economics and sustainable development The editors have assembled a fascinating collection of papers from some of the leading scholars in the field of ecological economics Topics covered include the contribution of classical economics to ecological economics alternatives to the growth paradigm and Gross Domestic Product valuation in ecological economics and indicators of natural resource scarcity case studies of sustainable development critical reviews of the environmental Kuznets curve green national accounting This will be an invaluable text for scholars policy analysts and students interested in sustainable development and ecological environmental and resource economics *Routledge Handbook of Major Events in Economic History* Randall

Parker, Robert Whaples, 2013-02-11 The Handbook of Major Events in Economic History aims to introduce readers to the important macroeconomic events of the past two hundred years The chapters endeavour to explain what went on and why during the most significant economic epochs of the nineteenth twentieth and early twenty first centuries and how where we are today fits in this historical timeline Its short chapters reflect the most up to date research and are written by well known economists who are authorities on their subjects The Handbook of Major Events in Economic History was written with the intent of presenting the professional consensus in explaining the economics driving these historical events *Handbook of Forest Resource Economics* Shashi Kant, Janaki Alavalapati, 2014-04-03 It is increasingly recognized that the economic value of forests is not merely the production of timber Forests provide other key ecosystem services such as being sinks for greenhouse gases hotspots of biodiversity tourism and recreation They are also vitally important in preventing soil erosion

and controlling water supplies as well as providing non timber forest products and supporting the livelihoods of many local people This handbook provides a detailed comprehensive and broad coverage of forest economics including traditional forest economics of timber production economics of environmental role of forests and recent developments in forest economics The chapters are grouped into six parts fundamental topics in forest resource economics economics of forest ecosystems economics of forests climate change and bioenergy economics of risk uncertainty and natural disturbances economics of forest property rights and certification and emerging issues and developments Written by leading environmental forest and natural resource economists the book represents a definitive reference volume for students of economics environment forestry and natural resource economics and management *Selected References Concerning the USDA Forest Service*, 1995 **Handbook of Environmental and Resource Economics** Jeroen C. J. M. Van den Bergh, 2002-01-01 This major reference book comprises specially commissioned surveys in environmental and resource economics written by an international team of experts Authoritative yet accessible each entry provides a state of the art summary of key areas that will be invaluable to researchers practitioners and advanced students **The Forest Service** Gerald W. Williams, 2006-11-30 Established in 1905 The Forest Service is steeped in history conflict strong personalities including Theodore Roosevelt and Gifford Pinchot and the challenges of managing 193 million acres of national forests and grasslands This unique federal agency is one that combines forest management with wildlife fish recreation mining grazing and hundreds of other uses It operates in the midst of controversy and change The original intent was to protect the public forests protect the water supplies and when appropriate provide timber Much has changed over the last 100 years including many new laws but the fact that these lands are still fought over today shows the foresight of politicians foresters scientists and communities This work brings to light the many and varied activities of the agency that many people know little about in a world that is constantly changing Written by a former Forest Service national historian topics discussed in the work include wilderness and the Wilderness Act of 1964 recreation battles and interagency rivalry with the National Park Service timber management including clearcutting ecosystem management roadless area and controversies over RARE and RARE II studies fish and wildlife management including endangered species before and after the Endangered Species Act of 1973 and mining and the General Mining Act of 1872 It also discusses the future challenges forest fires water protection and restoration recreation involving the public and fish and wildlife *Theory and Implementation of Economic Models for Sustainable Development* J.C. van den Bergh, M.W. Hofkes, 2013-03-09 There is widespread concern for long term environmental issues in relation to economic processes and developments Among the concerned scientists are economists who have taken up the challenge to apply economic insights and tools for the study of long term environment economy interactions and to give the concept of sustainable development economic hands and feet This book presents a pluralistic perspective on efforts problems and successes in this area This collection of papers was originally prepared for an international symposium titled Economic

Modelling of Sustainable Development Between Theory and Practice which was hosted by the Vrije Universiteit in Amsterdam on December 20th 1996 The main motivation for this symposium was that the usefulness of the concept of sustainable development for theoretical and applied modelling is still being debated growth theorists resource economists ecological economists policy makers and many others are trying to deal with the concept in various and sometimes conflicting ways The aim of the symposium was to bring together different theoretical and implementational perspectives on modelling for sustainable development We hope that this volume will inform a wide audience about the perspectives and progress in this important area of research as well as stimulate further research notably on applied modelling and practical methods for the analysis of sustainable development at various spatial scales The papers have in due course been revised several times based on comments made by discussants referees and the editors

Forest Policy Bill Wilson, 1999 This book examines forest policy in some of the major forestry regions primarily the main competitors in world softwood markets For each region it provides an overview of the economy resource base composition of the forest industry and major stakeholders It then looks at policy issues including forest management timber pricing and exports environmental standards land ownership and use and the institutional setting for government agencies taxation labor and capital

Journal of Economic Behavior & Organization ,1992 Canadian Journal of Forest Research ,1993 **Forest Science** ,1992 Land and Forest Economics Gerrit Cornelis Van Kooten, Henk Folmer, 2004 This text provides a comprehensive introduction to the important issues of land use and forest economics The authors employ economic tools to study the allocation of land among alternative activities such as agriculture grazing and forestry which impact upon the landscape The book begins by explaining general economic concepts of well being welfare measurement and economic rents before providing a synopsis of various environmental economic issues including non market valuation cost benefit analysis and sustainable development The authors then move on to address several critical topics relating to land use the conservation of nature and the protection of agricultural land These include an analysis of agricultural land use from the perspective of urban expansion and the interface between crop production and nature They also discuss the economics of public lands range and ranching forestry and global climate change in a comprehensive fashion Throughout the book the focus is on enhancing welfare for society as a whole rather than for particular individuals interest groups or sectors In this way the authors present a balanced and just approach to policy decisions regarding the allocation of scarce land resources Accessible and self contained this text will become indispensable to postgraduate and undergraduate students on a range of courses including agricultural and environmental economics geography and resource management Although primarily a textbook it will also provide a useful overview for policymakers range scientists public land managers and anyone with an interest in the economic evaluation of rural land use and forestry

America, History and Life ,1993 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide Predicting

Employment Impacts of Changing Forest Management in California William Calder Stewart,1993 (Re) Claiming the Watershed Sissel Annette Waage,2000 Whitaker's Book List ,1991 **PAIS Bulletin** ,1990-10 *Drawing Lines in the Forest* Kevin R Marsh,2007 Drawing boundaries around wilderness areas often serves a double purpose protection of the land within the boundary and release of the land outside the boundary to resource extraction and other development In *Drawing Lines in the Forest* Kevin R Marsh discusses the roles played by various groups the Forest Service the timber industry recreationists and environmentalists in arriving at these boundaries He shows that pragmatic rather than ideological goals were often paramount with all sides benefiting *Land Economics* ,1991
