**The Transformation of Governance in Rural China** An Chen,2015 Explores the economic social and financial changes that have transformed China s rural governance over the past twenty years      **Developmentalism** Graham Harrison,2020-06-19 Why do so few countries achieve development success Achieving development requires many changes over a short period of time generating instability and risk It is a deep and integrated economy of change involving force strategic thinking and ideological conviction it emerges when successful development is seen as necessary for the survival of a political order Developmentalism engages with the moral issues that this raises Developmentalism The Normative and Transformative within Capitalism uses a historical comparative approach to understand development as a transformation which involves a deep and integrated political economy of change a shift from a state of capital ascendance to capital dominance It is only through a transformation towards capital dominance that mass poverty reduction and the construction of a commonwealth are possible However capitalist development is extremely difficult and requires a highly exacting political endeavour The politics of development is conceptualized as developmentalism a strategy and ideology in which governments exercise heavy directive power endure instability and crisis and secure a rudimentary legitimacy for their efforts This book argues that developmentalism requires a conflation of successful capitalist transformation with some form of existential insecurity of the state itself It flourishes when capitalist transformation connects to profound questions of sovereignty statehood nation building and elite survival Developmentalism shows deep contextualisation of capitalist transformation as well as the massive improvements in material life that it has generated

Strategic Action Of Private Entrepreneurs In Contemporary China* Thomas Heberer,Gunter Schubert,2020-04-22

This book provides a fresh perspective on the political agency of private entrepreneurs in contemporary China Most Chinese scholarship describes this group as being politically acquiescent due to systematic co option by the party state This book however argues that private entrepreneurs should be understood and analytically conceptualized as a strategic group that makes use of different formal

and informal channels to safeguard and expand its interests though so far it has not challenged the current regime State business relations in contemporary China should thus be understood not in terms of mere clientelism but as a dynamic symbiosis in which private entrepreneurs contribute substantially to policy and institutional change This book is based on several years of comparative empirical fieldwork across China With its rich and unique qualitative data and insights this volume contributes significantly to our understanding of the political behaviour and impact of private entrepreneurs in contemporary China

**Contemporary China's Land Use Policy** Long Cheng,2020-09-24 This book discusses contemporary China's land use policy the Link Policy which calls for land consolidation and rural resettlement to achieve the goal of preserving farmland while also providing more space for urban development Given the limited analyses and commentaries on the Link Policy in the literature particularly in English language articles the book systematically presents and analyzes China's land use policy by assessing the impacts of the Link Policy on rural life and how effective the Link Policy is in achieving its objectives It also examines how satisfied farmers are with the policy and what the contributing factors are Drawing on a critical review of the literature field observations and interviews with resettled farmers the book offers insights into China's land use policy and compares it with similar policy instruments in other countries Presenting research findings that help readers gain a holistic understanding of the Link Policy in China and its implications the book is a valuable resource for professionals in other developing countries that are facing similar challenges in terms of balancing urban development and farmland conservation

**Government and Market in China** Jian Zhang,2004 This book examines the key role played by local governments in China's market oriented economic reform process since 1978 In particular it addresses the much debated questions of why Communist Party officials at the local level embraced market reform despite its potentially detrimental effects on their power and how the choices they made have shaped institutional changes and the pattern of development in the economies under their jurisdiction In contrast to most recent studies of local governments in China which have tended to explain local state activism in terms of the economic interests of local government officials this book highlights the role that political interests have played in shaping economic behaviour The contention is that the active involvement of local governments in the economy has been motivated not only by a desire to seek economic benefits but also and more importantly by political considerations The political perspective emphasised in this book leads to a reassessment of the nature and effect of the role of local government in the economic growth and institutional changes in China's transitional economy Tracing the behaviour of local government to its political origin the book not only explains more fully the motivational sources of economic activism at the local level but also demonstrates the contradictory ways in which local governments intervene in the economy the internal weakness of the local state led development and how problems caused by politically motivated economic intervention catalysed the privatisation of the local government run economic sector during mid 1990s

Tsai,2002 Chinese entrepreneurs have founded more than thirty million private businesses since Beijing instituted economic reforms in the late 1970s Most of these private ventures however have been denied access to official sources of credit State banks continue to serve state owned enterprises yet most private financing remains illegal How have Chinese entrepreneurs managed to fund their operations In defiance of the national banking laws small business owners have created a dizzying variety of informal financing mechanisms including rotating credit associations and private banks disguised as other types of organizations Back Alley Banking includes lively biographical sketches of individual entrepreneurs telling quotations from official documents policy statements and newspaper accounts and interviews with a wide variety of women and men who give vivid narratives of their daily struggles accomplishments and hopes for future prosperity Kellee S Tsai s book draws upon her unparalleled fieldwork in China s world of shadow finance to challenge conventional ideas about the political economy of development Business owners in China she shows have mobilized local social and political resources in innovative ways despite the absence of state directed credit or a well defined system of private property rights Entrepreneurs and local officials have been able to draw on the uncertainty of formal political and economic institutions to enhance local prosperity
