## **The Turning Point Science Society And The Rising Culture:**

**The Turning Point** Fritjof Capra, 1984-08-01 A compelling vision of a new reality a reconciliation of science and the human spirit for a future that will work The dynamics underlying the major problems of our time cancer crime pollution nuclear power inflation the energy shortage are all the same We have reached a time of dramatic and potentially dangerous change a turning point for the planet as a whole We need a new vision of reality one that allows the forces transforming our world to flow together as a positive movement for social change Now distinguished scientist Fritjof Capra gives us that vision a holistic paradigm of science and spirit This splendid and thoughtful book is an essential guide for anyone inquiring about the place of science and metascience in our contemporary culture Those who enjoyed Fritjof Capra's Tao of Physics should not expect a sequel this is a much more ambitious book that attempts and succeeds in presenting a whole worldview from the viewpoint of a committed and experienced physicist who also writes from within the North American culture It is unusually detailed and thorough in its inclusion of the conventional and the alternative approaches to topics ranging from ecology through medicine and psychology to economics It is at once scholarly and easy to read Jim Lovelock *New Scientist*

The Turning Point Fritjof Capra, 1982 **Indigenous Knowledge and the Integration of Knowledge Systems** Catherine Alum Odora Hoppers, 2002 This book explores the role of the social and natural sciences in supporting the development of indigenous knowledge systems It looks at how indigenous knowledge systems can impact on the transformation of knowledge generating institutions such as scientific and higher education institutions on the one hand and the policy domain on the other

**The Turning Point** Fritjof Capra, 1982-01-01 The Turning Point is a powerful book It is informative provocative and radical it will be controversial With devastating clarity Capra shows how in every field of science and in the health field as well our methods and theories are leading to our own destruction But Capra sees the science of physics which led us into our present fragmented world via Newtonian mechanics as leading us out of this obsolete view of the universe with its new and liberating findings from back cover

problems we face as a global society yet also inspiring examples of innovative solutions it explores our deepest fears and our highest hopes for the future It is a must read for anyone who wants to tap into the wisdom of our age *Quantum City* Ayssar Arida,2002 Can a world view based on quantum theory produce a better approach to the problems of the city Arida links the concepts of quantum theory to the field of urban design encouraging the urban designer and architect to look at the design of cities from a new perspective *The Phenomenon of Teilhard* David H. Lane,1996 New Age writer of the popular Aquarian Conspiracy Marilyn Ferguson observed that many of the leading lights of the New Age movement claim Teilhard as one of the most influential persons in their lives Other influences acknowledged include C G Jung Aldous Huxley Swami Muktananda Thomas Merton Werner Erhard and Maharishi Yogi Indeed of the 185 New Age leaders surveyed Teilhard was the most frequently mentioned of any person who had most influenced their thinking If this is the case then if we are to understand the New Age movement properly it behooves us to take a careful and critical look at Teilhard de Chardin David Lane has done precisely this in a clear well documented and penetrating way In this crucial book David Lane lays bare the philosophical theological and scientific failures of Teilhard s New Age enterprise In a highly documented and insightful scrutiny of Teilhard s cosmic evolution Lane unveils the apostate Christian roots of one of the most important forerunners of the New Age movement This is one of the most significant and serious treatments of the modern roots of the New Age in print *The Social Constructions and Experiences of Madness* Monika dos Santos,Jean-Francois Pelletier,2018-02-01 Over the course of the centuries the meanings around mental illness have shifted many times according to societal beliefs and the political atmosphere of the day The way madness is defined has far reaching effects on those who have a mental disorder and determines how they are treated by the professionals responsible for their care and the society of which they are a part Although madness as mental illness seems to be the dominant Western view of madness it is by no means the only view of what it means to be mad The symptoms of madness or mental illness occur in all cultures of the world but have different meanings in different social and cultural contexts Evidence suggests that meanings of mental illness have a significant impact on subjective experience the idioms used in the expression thereof indigenous treatments and subsequent outcomes Thus the societal understandings of madness are central to the problem of mental illness and those with the lived experience can lead the process of reconstructing this meaning *Societal Impact of Spaceflight* Steven J. Dick,Roger D. Launius,2007 Since the dawn of spaceflight advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life Assertions abound about the impact of spaceflight on society and its relationship to the larger contours of human existence Fifty years after the Space Age began it is time to examine the effects of spaceflight on society in a historically rigorous way Has the Space Age indeed had a significant effect on society If so what are those influences What do we mean by an impact on society And what parts of society Conversely has society had any effect on spaceflight What would be different had there been no Space Age The purpose of this volume is to examine these and related

questions through scholarly research making use especially of the tools of the historian and the broader social sciences and humanities. Herein a stellar array of scholars does just that and arrives at sometimes surprising conclusions. *Handbook of Faith and Spirituality in the Workplace* Judi Neal, 2012-12-09. While the field of management has developed as a research discipline over the last century until the early 1990s there was essentially no acknowledgement that the human spirit plays an important role in the workplace. Over the past twenty years the tide has begun to turn as evidenced by the growing number of courses in academia and in corporate training and an exponential increase in the publications emerging through creative interaction of scholars and practitioners in organizational behaviour, workplace diversity, sustainability, innovation, corporate governance, leadership and corporate wellness as well as contributions by psychotherapists, theologians, anthropologists, educators, philosophers and artists. This Handbook is the most comprehensive collection to date of essays by the preeminent researchers and practitioners in faith and spirituality in the workplace, featuring not only the most current research and case examples but visions of what will be or should be emerging over the horizon. It includes essays by the people who helped to pioneer the field as well as essays by up and coming young scholars. Among the questions and issues addressed: What does it mean to be a spiritual organization? How does this perspective challenge traditional approaches to the firm as a purely rational profit maximizing enterprise? Is faith and spirituality in the workplace a passing fad or is there a substantial shift occurring in the business paradigm? How does this field inform emerging management disciplines such as sustainability, diversity and social responsibility? In what ways are faith and spirituality in the workplace similar to progressive and innovative human resource practices? Does faith and spirituality in the workplace bring something additional to the conversation and if so what? The aim of *The Handbook of Faith and Spirituality in the Workplace* is to provide researchers, faculty, students and practitioners with a broad overview of the field from a research perspective while keeping an eye on building a bridge between scholarship and practice.

**Precision-guided Munitions and Human Suffering in War** James E. Hickey, 2016-04-08. James Hickey proceeds from the premise that throughout history humans have demonstrated a proclivity for using violence against one another as a means to achieve an end. Means enabled in many respects by the technologies available at the time. Advancing technology has often been a prime enabler of ever increasing levels of violence and attendant human suffering. At a few junctures in history however certain technologies have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering. Today precision guided munitions (PGMs) with their high degree of discrimination and accuracy again hold such promise. This book seeks to answer the question: Do PGMs mitigate suffering in war and have these weapons changed the way decisions regarding war and peace have been made? Answering this question helps us understand possible shifts in emphasis in modern warfare both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict. This book will help students of ethics, just war and military history and senior military and civilian leaders to understand the possible

outcomes and wider implications of their strategic choices to use such technology      **Science, Technology and Society**
