Attack Proof John Perkins, Al Ridenhour, Matt Kovsky, 2000 Martial arts can teach people many important lessons about

discipline conditioning and dedication But as an effective means of self defense and survival in brutal real world attacks almost all martial arts come up short This is because most self defense applications of martial arts rely on patterned choreographed techniques that have no relation to the chaos and randomness that rules during life and death fights Attack Proof offers a dramatically different kind of self defense system that really works It s based on the insights real world experiences and forensic research of John Perkins a New York cop who teaches hand to hand combat to military and police instructors A survivor of over 100 documented armed and unarmed violent encounters Perkins also engaged in unlicensed pit fights and was a bodyguard with an international clientele Revolutionary in its approach the book helps you to become a master of random motion or guided chaos where you create a defense during attacks using principles of movement and physics These principles are taught through many drills and exercises which focus on improving balance looseness sensitivity and power This book provides a wide selection of basic to advanced tactics and principles with nearly 200 accompanying photographs that show correct positioning and maneuvers You learn what to do and what not to do in potentially life threatening situations including muggings carjackings abductions knife fights and gunfights Plus the authors back up their teaching with illuminating real world anecdotes Attack Proof is essential for anyone interested in personal safety If you are already trained in a particular martial art you will dramatically enhance your combat skills If you practice tai chi you may discover secrets that have long eluded you If you are a novice you will learn the basics of survival while improving your coordination timing and balance Protect yourself by being prepared for the unexpected and become a martial realist Visit AttackProof.com for more information
