programs for young to elite athletes requires a solid foundation of physical abilities. It's helpful to think about the training pyramid when creating a program. The training pyramid provides a framework for creating training plans for all levels of athletes. Every athlete strives to be the best they can be in terms of strength, speed, and competition. Each athlete is unique in terms of their talents and weaknesses as well as their training experience. What we need to do is look at what constitutes a solid basis for athletic success. Following our performance evaluation, we are able to determine each athlete's areas of strength and weakness. The training pyramid serves as a foundation for the development of higher-level athletic abilities. If your abilities at the bottom of the pyramid are weak, your performance in the abilities above will suffer.
