Kok,David Seignior,Michelle Barrett,2025-05-26 The demand for online health professional educational programs has grown rapidly in recent years driven by technological advances and an increasing learner appetite for flexible accessible educational experiences As the uptake of online techniques has increased so has the research into their pedagogical underpinnings However the speed of these developments means many health professional educators remain unfamiliar with the evidence base and practicalities of actually designing and delivering these learning experiences This book summarizes best practices in online education in a succinct curated and practical manner It is designed with the busy health professional educator in mind and is written by fellow health professional educators who understand the everyday challenges of the role It highlights core principles gives step by step guidance on how to implement these for clinical learners and includes copious tips and tricks to facilitate success Covering everything from basic online implementations through to the advanced integration of Artificial Intelligence into learning programs this book will serve as a valuable resource for any educator wanting to familiarise themselves with this important new discipline      *Critical Theory and Transformative Learning* Wang, Viktor,2018-06-04 Engaging in genuine dialogue and authentic communication is essential for teachers to assist students successes and help them further their education through refining critical thinking skills beyond the classroom Critical Theory and Transformative Learning is a critical scholarly resource that examines and contrasts the key concepts related to critical approaches in educational settings Featuring coverage on a broad range of topics including repressive tolerance online teaching and adult education this book is geared toward educators administrators academicians and researchers seeking current research on transformative learning

and addressing the interconnectedness of important theories and praxis

**Learner-Centered Theory and Practice in Distance Education** Thomas M. Duffy, Jamie R. Kirkley, 2003-12-08 Learner Centered Theory and Practice in Distance Education Cases From Higher Education brings the voice of the learning sciences to the study and design of distance learning The contributors examine critical issues in the design of theoretically and pedagogically based distance education programs Eight distance education programs are described in enough detail to allow readers with different interests to understand the pedagogical approaches and the implications of implementing those approaches Issues of theory pedagogy design assessment communities of practice collaboration and faculty development are discussed Each section of the book includes a primary chapter written by an author or authors involved with a distance education program that reflects learner centered principles a formal reaction to the chapter by a specialist from the learning sciences educational evaluation and policy administration or the corporate sector with expertise in issues of distance learning and an edited transcript of the authors discussion of the primary chapter held at a symposium at the Asilomar Conference Center A final summing up section offers two perspectives from leading scholars outside the fields of instructional design evaluation and the learning sciences on the approaches and thinking reflected in the rest of the book This book is essential for researchers as well as all those engaged in delivering supporting or administrating distance education programs at the post secondary level The descriptions strategies and principles will inform the design of continuing education as well as degree based education and corporate education and training and distance education programs for adults

**Handbook of Online Learning** Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs

about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments
