The Unbounded Mind Breaking The Chains Of Traditional Business Thinking:

The ^AUnbounded Mind Ian I. Mitroff, Harold A. Linstone, 1993-01-21 Global markets Japanese competition the service economy the sophisticated consumer American business today faces challenges undreamed of just a few decades ago and traditional approaches to corporate problems are becoming increasingly less effective And yet as the authors of The Unbounded Mind point out MBA programs still preach and thousands of American firms hold sacred an antiquated system of business thinking that is wholly inadequate to the problems they face In this groundbreaking work two pioneering thinkers in business studies Ian I Mitroff and Harold A Linstone pinpoint the profound changes that must occur in the way business executives think make decisions and solve problems if America is to remain competitive They put forth a radically new approach new thinking and show executives exactly how to employ these special critical and creative tools to clear the hurdles businesses now face Logic and rationality they explain are useful but limited And traditional simplification often inhibits the ability to ask the right questions and recognize the true problem But varying perspectives multiple realities and openness to multiple solutions are the secrets of contemporary problem solving and lead us to the cutting edge of innovation Clearly and compellingly Mitroff and Linstone weave together insights gleaned from philosophy psychology management science economics and decision science and quote thinkers from Descartes to Robert Bly from Alvin Toffler to Chief Seattle In illustrating how new thinking differs from the usual ways in which American firms have handled problems they analyze a wealth of examples including the decline of the American auto industry and the consequences of this country's blind exporting of technology They also revisit and interpret some of the most grave crises corporate America has faced the Bhopal disaster the Tylenol scare and the accident at Three Mile Island Hard hitting and insightful The Unbounded Mind is a clarion call for American business It argues that if we are to produce products and services that can compete in the information age we must challenge the very foundations of our thinking and learn how to approach decisionmaking in a truly creative way

Why Some Companies Emerge Stronger and Better from a Crisis Ian I. Mitroff, 2008-01-21 Do your company and employees have the necessary IQ not only to withstand a crisis but also come through it with strength and confidence Like many companies over the last few years yours has probably done a great deal to reassess its physical strategic and financial vulnerabilities However there is a huge difference between business continuity planning and true crisis management Ian Mitroff outlines seven distinct competencies your organization needs to handle crises effectively Right Heart emotional IQ By accepting crisis as an inevitability you can process much of the shock and grief beforehand and avoid making the effects of the crisis even worse through an unconstructive response Right Thinking creative IQ Crises don't care about the ways in which we have organized the world so out of the box thinking is essential Right Social and Political IQ Understand that your business is subject not only to the pitfalls of its industry but to the universal and complex challenges that threaten all companies Right Integration integrative IQ Realize that crises are perceived differently by different stakeholders and are

never simple exercises that can be solved Identify and reconcile these perceptions now so that the path is clear when the crisis strikes Right Technical IQ Think like a controlled paranoid to uncover ways in which malicious forces could cause a crisis in your company Question every assumption about what is normal impossible or absurd Right Aesthetic IQ Reconsider the classic design of the corporation which is meant to address problems as they arise and move toward one in which crisis management is an overarching discipline on a par with for example finance Spiritual IQ Reject the notion that people's physical mental and spiritual beings are completely separate and establish ahead of time why our work is and must remain important to us on many different levels Although crisis management has taken on new urgency in recent turbulent times the need for careful planning did not originate on September 11 2001 Mitroff's examples drawn from interviews conducted both before and after the 2001 attacks during his 25 years of experience demonstrate the need for action and offer a blueprint for taking it Cybernetics and Systems Theory in Management: Tools, Views, and Advancements Wallis, Steven E., 2009-12-31 Cybernetics and Systems Theory in Management Tools Views and Advancements provides new models and insights into how to develop test and apply more effective decision making and ethical practices in an organizational setting **The Interdependent Organization** Rexford H. Draman, 2017-09-08 The Interdependent Organization provides its readers with a template for the development of an individualized transition plan to guide their journey toward becoming more organizationally sustainable We as humans tend to rely on our current set of assumptions when we evaluate our actions and their potential impact on the future With today's ever increasing rate of change in technology our access to information and cultural interactions interdependence around the world the reliance on old ways of thinking linear will not allow us to effectively transition into the systems based world of tomorrow The Interdependent Organization presents a deeper understanding of the financial operational and cultural crossroads we are facing as a planet and introduces a systems based transitional path that individuals organizations and societies can draw on to move towards a more holistic and sustainable future The book provides readers with the necessary understanding and insight into systems systems thinking and the use of systems based business tools to guide the sustainability journey while producing a positive impact to the organization's bottom line its employee engagement and its stakeholders expectations in each of the journey's three stages The journey begins with the adoption of simple yet powerful systems based tools for managing the organization's operations and projects These proven tools provide increased productivity with a proven bottom line improvement that exceeds 30% This introduction to systems based tools and thinking provides the organization with the time to become more familiar with this new way of thinking and making business decisions before they expand their exposure to broader more complex systems based and sustainable practices The second stage of this journey is focused on introducing new tools and practices to insure a consistent set of measures are used across the organization The third and final stage focuses on aligning the organization's people management practices Academy of Management Journal Academy of Management, 1993 Issue for Aug 1957 2005

Harris, 1999-12-22 Inventing the Future Information services for a New Millennium is a sequel to Harris and Hannah's 1998 book Into the Future In this book they move beyond the rhetorical contests about the future of the library and turn their attention to the more prosaic but vital task of managing our ever more complex and constantly changing libraries The pages in this book present a blueprint that will guide us in the re-visioning of library and information services allowing us to remain true to our inherited legacy while looking insistently for innovative and effective ways of inventing our future **Ohio State Journal on Dispute Resolution** ,2014 *Business Horizons* ,1993 **Examining Business**

Process Re-engineering Gerard Burke, Joe Peppard, 1995 This collection of essays examines the key issues relating to business process re-engineering BPR The contributors assess the relative merits and true value of BPR analyzing its impact on the business community **Business Process Re-engineering** B. C. Glasson, 1994 The focus of this publication is BPR Business Process Re-engineering and the challenges and opportunities it brings to the field of information systems The key to successful BPR from an information systems perspective is perceived to lie in integration Papers included in the book accordingly consider the following three areas both individually and in combination Business Process Re-engineering Information Systems Opportunities or Challenges Information Systems Integration Business Process Re-engineering is the restructuring of organizational processes through the innovative use of information systems and technology IS T The aim is

to refit or revamp an organization to survive today's economic downturn and to emerge refreshed and re-vitalized to meet its social obligations and accept its economic challenges into the next century. Information systems opportunities and challenges facing business process re-engineers revolve around integration. It is believed that unidimensional, specialized, segmented and piecemeal approaches have been adopted in IS/T which do not work. If IS/T is to achieve its full potential for social and economic good, there is little need for holistic, multi-dimensional, comprehensive approaches. IS/T researchers and practitioners should look to integrate their efforts with those of others in at least three ways. Integrating theory and practice will encourage relevant research and more rapid technology transfer. Integrating technical and social aspects will help alleviate those implementation issues that have bedeviled IS/T for decades. Integrating applications and subject matter will result in synergistic, multi-disciplinary approaches and solutions combining the interests of the many specialists involved in the field. The broad-ranging examination of these factors offered by the book highlights the overall need for information systems and technology integration if active responses to the opportunities and challenges presented by Business Process Re-engineering are to be achieved.
