An economist's version of *The Way Things Work*, this engaging volume is part Economics 101 and part expose of the economic principles lurking behind daily events, explaining everything from traffic jams to high coffee prices. New to this edition, this revised edition newly updated to consider the banking crisis and economic turbulence of the last four years is essential for anyone who has wondered why the gap between rich and poor nations is so great or why they can't seem to find a decent second hand car or how to outwit Starbucks. Senior columnist for the *Financial Times*, Tim Harford brings his experience and insight as he ranges from Africa, Asia, Europe and the United States to reveal how supermarkets, airlines and coffee chains, to name just a few, are vacuuming money from our wallets. Harford punctures the myths surrounding some of today's biggest controversies including the high cost of health care; he reveals why certain environmental laws can put a smile on a landlord's face and he explains why some industries can have high profits for innocent reasons while in other industries something sinister is going on. Covering an array of economic concepts including scarce resources, market power, efficiency, price gouging, market failure, inside information and game theory, Harford sheds light on how these forces shape our day to day lives, often without our knowing it. Showing us the world through the eyes of an economist, Tim Harford reveals that everyday events are intricate games of negotiations, contests of strength and battles of wits.
