Mittelman,2018 Why the paradigm of the world class university is an implausible dream for most institutions of higher education Universities have become major actors on the global stage Yet as they strive to be world class institutions of higher education are shifting away from their core missions of cultivating democratic citizenship fostering critical thinking and safeguarding academic freedom In the contest to raise their national and global profiles universities are embracing a new form of utilitarianism one that favors market power over academic values In this book James Mittelman explains why the world class university is an implausible dream for most institutions and proposes viable alternatives that can help universities thrive in today s competitive global environment Mittelman traces how the scale reach and impact of higher education institutions expanded exponentially in the post World War II era and how the market led educational model became widespread Drawing on his own groundbreaking fieldwork he offers three case studies the United States which exemplifies market oriented educational globalization Finland representative of the strong public sphere and Uganda a postcolonial country with a historically public but now increasingly private university system Mittelman shows that the world class paradigm is untenable for all but a small group of wealthy research intensive universities primarily in the global North Nevertheless institutions without substantial material resources and in far different contexts continue to aspire to world class stature An urgent wake up call Implausible Dream argues that universities are repurposing at the peril of their high principles and recommends structural reforms that are more practical than the unrealistic worldwide measures of excellence prevalent today U S NEWS ULTIMATE COLLEGE DIRECTORY 2004 MCGRATH ANNE (EDITOR),2003 *A Quantum City* Ludger Hovestadt,Vera Bühlmann,2015-06-16 We know the specific strengths of various cities are aware of their ranking are able to discuss their density and growth But what do all cities have in common what do we know about the lowest common denominator The city as a species the primal genetic material of the city this is the subject of *A Quantum City* This colossal work is a love letter to the city and intellectual culture We follow the fictional narrative figure Orlando beginning in 320 BC on his odyssey through the Western world up to the present time The book is divided into four interrelated chapters and can be read page by page in a discursive manner however randomly browsing through the book also offers new and multi faceted interpretations Great intellectual achievements are compared with obscure and mundane events *A Quantum City* offers an inspiring view of the

city that is in us and around us     Virtual University? Henk van der Molen,2001 Higher education institutions around the world are experimenting with many different types of virtual learning environments This book argues that information and communication technologies will have a major impact on teaching and learning and universities should have a strategy to meet this change It posits that institutions and individuals will not be able to individually obtain the best advantages from these new technologies that there is need for specialization and cooperation Experiences with Internet learning indicate that students as well as teachers have to accept patterns quite different from the traditional teaching learning pattern Traditional university staff may resist these changes but institutions which do not adjust to the new opportunities are likely to shrink or even disappear     **Trusteeship** ,2002     **Four-Year Colleges 2009** Peterson's,2008-06 Complete and up to date information on academics faculty research tuition sports and campus life at four year colleges in the U S and Canada
