The Descriptive Phenomenological Method in Psychology Amedeo Giorgi, 2009 This comprehensive work from one of the leading thinkers in humanistic psychology provides a thorough discussion of the phenomenological foundations for qualitative research in psychology Amedeo Giorgi's examination operates out of the intersection of phenomenological philosophy science and psychology such a multidisciplinary approach allows him to challenge several long standing assumptions about the practice of psychology Giorgi asserts that empiricism is not the best philosophy for grounding the science of psychology rather the broader phenomenological theory of science permits more adequate psychological development Giorgi draws from Husserl's philosophical principles the reasons for conducting research in psychology and then offers practical steps for applying a phenomenological method and real examples of applications of the method In fact Giorgi proposes a method that is theoretically grounded in phenomenological philosophy and yet treats empirically derived data This is a rigorous but open qualitative research method that is tolerant of pararational givens as well as one that is supportive of rational criteria The analyses and methods presented in *Phenomenological Method in Psychology* will be attractive to psychologists phenomenologists and researchers involved in qualitative research throughout social and human science disciplines

Handbook of Identities in Organizations Andrew D. Brown, 2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

Reflections on Certain Qualitative and Phenomenological Psychological Methods Amedeo Giorgi, 2020-06-15 One could describe the status of psychological research today as one in which qualitative methods based upon diverse philosophies have been developing and advancing at a fast pace It is a time therefore when reflections on this state of affairs are appropriate The five essays in this book are all concerned with qualitative methods and their philosophical backgrounds Briefly the first essay contrasts the relative merits of the three most used philosophical bases for qualitative methods empirical philosophy hermeneutics and Husserlian descriptive

phenomenology The second essay tries to resolve the tensions between descriptive and interpretive methods Both are of service to science but they relate to different conditions The third essay discusses certain pitfalls that should be avoided when conducting psychological research on oneself The fourth essay describes the extension of certain guidelines when using the descriptive phenomenological method The fifth essay challenges the assumption of naturalism for psychology and argues for the development of a non naturalistic method for psychology

Choice , 2009 *Descriptive Phenomenological Psychological Method* Rodger Broome, 2011 This paper is the methodology section of my doctoral dissertation that outlines the Descriptive Phenomenological Psychological Method of research as it has been taught to me by Amedeo P Giorgi Giorgi 2009 based his method on Husserl's descriptive phenomenological philosophy as an alternative epistemology for human science research This method section references Giorgi's work and the phenomenological tradition of Husserl Merleau Ponty and others Each step of Giorgi's 2009 modified Husserlian method is described and explained in the context of doing psychological research on the lived experience of the participants in my dissertation research The steps are 1 assume the phenomenological attitude 2 read entire written account for a sense of the whole 3 delineate meaning units 4 transform the meaning units into psychologically sensitive statements of their lived meanings and 5 synthesize a general psychological structure of the experience base on the constituents of the experience It is the first person psychological perspective that is sought so that an empathetic position can be adopted by the end user of the research
