

TAMD61A

**6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel
with aftercooler — crankshaft power:* 225 kW (306 hp)**

The TAMD 61A is a powerful, reliable and economical marine diesel. Thanks to Volvo Penta's extremely comprehensive range of equipment, this engine can be perfectly matched to specific customer and market demands.

The engine block and cylinder heads are made of cast steel. The cylinder linings incorporate a flame barrier which protects the cylinder head gasket. Each cylinder head is tightened down with 20 screws. The pistons are oil-cooled, which reduces the amount of carbon deposits. The heat exchanger and charge air cooler matrices are identical, which means that they are fully interchangeable.

The electrical system is a 12 V system of the plug-in variety with all electrical wiring included. Alternatively a 24 V electrical system may be specified. Automatic heating of the induction air ensures reliable starting at low temperatures.

The injection pump is equipped with a smoke limiting device which reduces the emission of smoke during swift acceleration and under heavy loads. A bypass valve between the turbocharger and the charge air cooler (after cooler) reduces the emission of white fumes when the engine is started and when it is operated under conditions of low load. An automatic wastegate controls the degree of boost, either through the charge air cooler (after cooler) or at low speeds directly through the induction manifold.

The coolant pump is gear-operated and the raw water pump is mounted on the front of the timing case for ease of service. The oil filter and oil filter are also mounted on the front of the engine.

Volvo Penta has a well-established service network in more than 100 countries. Authorized workshops using genuine parts and staffed by skilled personnel provide the customer with the best possible service.

* Crankshaft power according to ISO 8665.
